REPORT ON PUBLIC INSTRUCTION IN BOMBAY FOR 1939-40.

CHAPTER I.

General Progress.

General features of Education in the Province.

1(1). The report of this year, it will be noticed, has been considerably curtailed. All those items which recur year after year and do not pertain specifically to the year under report have been weeded out so far as possible. I have merely reported progress and added a few remarks on matters which appear to call for special notice.

The year in educational matters has not greatly differed from its predecessor. Primary Education has continued to maintain the progress made possible by the funds spent upon it and the numbers have actually increased at a higher rate than last year. This increase is mainly due to the opening of new aided Primary schools in villages. Expenditure on Education has risen to Rs. 4·39 crores about half of which comes from Provincial funds, while about 39 per cent. is contributed from fees and endowments and 16 per cent. from Local funds. About 45·6 per cent. of this expenditure is on Primary Education.

1(2). The main features as revealed by statistics may be summed up as follows :—

Institutions.

Educational institutions increased in number by 3,593 to 22,322. Of these, 21,856 were recognised and 466 unrecognised, as against 18,211 and 518 in the preceding year. The recognised institutions comprised, besides the University School of Economics and Sociology, 18 Arts and Science Colleges, 14 Professional Colleges, 790 Secondary schools, 19,115 Primary schools and 1,918 Special schools. The three new Collegiate institutions are the Deccan College Research Institute, Poona, the College for Secondary Teachers and the Law College at Belgaum, an account of which appears in Chapters IV and V. Sixty new Secondary schools and 2,680 new Primary Schools came into being—the latter were almost all approved Primary schools. The opening of classes for adults mainly accounts for the increase of 902 in Special schools.

Of the 21,600 towns and villages 13,400 have schools, which shows an increase of 1,500 villages with schools. It is gratifying to note that now only 33 large villages have no schools. It is hoped that in a year or two all such villages will have a school. Of the 8,000 villages without a school, it must be remembered that many of these are but small scattered hamlets.

Pupils.

1(3). The total number of pupils in all kinds of educational institutions rose from 1,566,441 to 1,782,072, i.e. an increase of 215,631, or 13·8 per cent., during the year. The percentage of male scholars to the total male population increased from 12·70 to 14·30 and that of female scholars from 4·48 to 5·25.

Of the 1,782,072 pupils under instruction, 1,753,701 (1,310,058 boys and 443,643 girls) were in recognised institutions and 28,371 in unrecognised institutions. The percentage of pupils in recognised institutions to the total population of the Province increased from 8·58 to 9·79.

Of the 1,753,701 pupils in recognised institutions 1,500,456 were in Primary schools, 168,587 in Secondary schools, 17,787 in Colleges and 66,871 in Special institutions. The "General summary of Institutions and Scholars" published at the end of this Report gives further details of the distribution of the pupils under instruction in various kinds of institutions.

The following table gives the number of pupils of the various communities under instruction in recognised institutions and their percentages to the population of the respective communities :—

Race or Creed.	Population (Census of 1931).	Percentage of population to total population.	Number of pupils under instruction.	
			1939–40.	1938–39.
1	2	3	4	5
Hindus .. Advanced ..	1,313,744	7·3	348,870	323,849
Hindus .. Intermediate ..	10,536,967	58·8	833,697	716,528
Hindus .. Backward ..	3,752,221	21·0	240,280	195,306
Total ..	15,602,932	87·1	1,422,847	1,235,683
Muslims	1,583,259	8·8	210,781	188,222
Anglo-Indians and Europeans.	32,204	0·2	5,284	5,412
Indian Christians ..	267,460	1·5	47,234	44,701
Parsis	85,662	0·5	18,278	17,734
Other Communities ..	344,801	1·9	49,277	45,011
Grand Total ..	17,916,318	100·0	1,753,701	1,536,763

Race or Creed.		Population (Census of 1931).	Percentage of pupils to total number of pupils.		Percentage of pupils to population.	
			1939–40.	1938–39.	1939–40.	1938–39.
1		2	6	7	8	9
Hindus ..	Advanced ..	1,313,744	19·9	21·1	26·6	24·7
	Intermediate ..	10,536,967	47·5	46·6	7·9	6·8
	Backward ..	3,752,221	13·7	12·7	6·4	5·2
	Total ..	15,602,932	81·1	80·4	9·1	7·9
Muslims		1,583,259	12·0	12·2	13·3	11·9
Anglo-Indians and Europeans.		32,204	0·3	0·4	16·4	16·8
Indian Christians ..		267,460	2·7	2·9	17·7	16·7
Parsis		85,662	1·1	1·2	21·3	20·7
Other Communities ..		344,801	2·8	2·9	14·3	13·1
	Grand Total ..	17,916,318	100·0	100·0	9·8	8·6

It will be seen that all the Indian communities shewed the increase in the number of pupils, the Anglo-Indians and Europeans, however, recorded a decrease of 128. This decrease appears to be due partly to certain members of the community having left the Province with their families owing to the general business slump and partly to the transfer of some of the day scholars to Boarding schools in other places outside the Province in consequence of the father or guardian being called to Military duty.

1(4). The total expenditure on Public Instruction during the year increased to Rs. 438·8 lakhs from Rs. 410·4 lakhs and was met from the following sources :—

Expenditure.

	1939–40.		1938–39.	
	Amount.	Percentage.	Amount.	Percentage.
	Rs.		Rs.	
Government funds ..	1,97,01,200	44·9	1,82,01,859	44·4
Board funds ..	69,75,484	15·9	67,58,902	16·5
Fees	1,20,25,838	27·4	1,08,83,453	26·5
Other sources ..	51,77,412	11·8	51,93,002	12·6
Total ..	4,38,79,934	100·0	4,10,37,216	100·0

It will be seen that while the Government share of the expenditure increased by 0·5 per cent., there was a corresponding decrease in the percentage from Boards funds. Similarly increase in fees is an offset to the decrease from other sources.

The following table compares the distribution of Provincial expenditure on various classes of institutions during the last two years :—

	1939–40.		1938–39.	
	Amount.	Percentage.	Amount.	Percentage.
1	2	3	4	5
	Rs.		Rs.	
University and Higher Education.	9,71,640	4·9	10,51,556	5·8
Secondary Education ..	20,62,515	10·5	19,90,368	10·9
Primary Education ..	1,22,22,124	62·0	1,16,16,611	63·8
Special Education ..	13,39,634	6·8	10,45,473	5·8
Total, Direct ..	1,65,95,913	84·2	1,57,04,008	86·3
Direction and Inspection	10,77,928	5·5	10,71,617	5·9
Buildings, etc. ..	9,74,817	4·9	5,24,145	2·9
Miscellaneous ..	10,52,542	5·4	9,02,089	4·9
Total, Indirect ..	31,05,287	15·8	24,97,851	13·7
Grand Total ..	1,97,01,200	100·0	1,82,01,859	100·0

1(5). Among the events of general interest may be mentioned—

Main events of the year.

1. The opening of a Government Training College for Secondary teachers at Belgaum, particularly for the Kannada and Marathi speaking graduates.

2. The revival of the Deccan College, Poona, as a Postgraduate and Research Institute.

3. The opening of a Government Institution for Kannada Research at Dharwar.

4. The conversion of five Government High Schools into Vocational High Schools :—

The Northcote High School, Sholapur, into a Technical High School.

The R. C. High School, Ahmedabad, into a Commercial High School.

The Government High Schools at Satara, Godhra and Bijapur into Agriculture High Schools.

5. The conversion of the Government High Schools at Surat and Ratnagiri into Primary Training Colleges for Men.

6. The Appointment of Assistant Deputy Educational Inspectors for Physical Education and of women Assistant Deputy Educational Inspectresses for the inspection of girls' schools.

7. The introduction of a Provident Fund Scheme for teachers in non-Government Secondary Schools.

8. The constitution of a Provincial Board for Education in Hindustani.

9. The constitution of a Provincial Board for Primary Education.

10. The introduction of the scheme of Basic Education in selected compact areas in the three linguistic Divisions of the Province.

CHAPTER II.

ADMINISTRATION.

2(1). The strength and composition of the various branches of the Educational Service on 31st March, 1940, stood as under :—

Cadres.

All-India (Indian Educational Service) Service.

Service.		No. of posts.
Administrative Branch (Direction, Inspection, etc.)	4	
Collegiate Branch	17	
		21

Bombay Educational Service Class I.

Administrative Branch (Direction, Inspection, etc.)	12	
Collegiate Branch	23	
		35

Bombay Educational Service Class II.

Teaching, Inspecting, and General ..	103	
Collegiate Branch	63	
		166

Subordinate Educational Service.

Inspecting	209	
Teaching	651	
Clerical	333	
Others	94	
		1,287

Miscellaneous and Special appointments outside the regular service.

Gazetted appointments	26	
Non-Gazetted appointments	77	
		103
Grand Total ..		1,612

The total number of teachers in Government, District Local Board and Municipal Primary schools was 32,675 against 31,153 in the preceding year, of whom the number of teachers in Government schools was 220 against 236 in the preceding year.

The permanent members of the All-India (I.E.S.) Service numbered 16, of whom 5 were Europeans and 11 Indians. There were 24 permanent B. E. S. Class I officers during the year under review, all of whom were Indians. Three posts were held in abeyance and replaced by contract appointments.

The principle that educationally backward communities should have a fair representation in the Educational Department was constantly kept in view in filling vacancies during the year.

Mr. W. Grieve, C.I.E., I.E.S., continued to hold the post of Director of Public Instruction almost throughout the year and proceeded on leave preparatory to retirement from 9th February 1940, from which date I took over charge. Mr. M. L. Tannan retired from the Indian Educational Service during the year.

Direction and Inspection.

2(2). The Provincial expenditure on Direction was Rs. 1,69,898 and on Inspection Rs. 9,08,030 which together amounted to Rs. 10,77,928 representing 5·5 per cent. of the total Provincial expenditure on Education. After the amendment of the Primary Education Act in 1938 the inspecting staff of the Local Authorities was taken over by the Department and the whole of the expenditure on Inspection is now met from Provincial funds.

Conferences.

2(3) A Departmental Conference of Inspecting Officers was held at Poona in November, 1939 to discuss matters of inspection and administration. A similar Conference of Principals of Colleges was held in January, 1940.

CHAPTER III.

UNIVERSITY.

Institutions and students.

3(1). At the end of the year 1939-40 there were 25 Arts and Science and 18 Professional Colleges affiliated to the University of Bombay, against 25 and 16 respectively in the previous year. In addition, the University maintains a School of Economics and Sociology and a Department of Chemical Technology.

Two new colleges were started during the year —

(1) the Government Secondary Training College, Belgaum, affiliated to the University for the teaching of the B.T. degree for a period of three years from June 1939, and

(2) the Raja Lakhamgouda Law College, Belgaum, affiliated to the University for the teaching of the LL.B. degree course up to 31st May, 1942.

As a result of the institution of the new University Diploma in Teaching for undergraduates, the affiliation of the following colleges was extended for the teaching of the Diploma course :—

(1) The Fergusson College, Poona.
(2) The Sir Parashurambhau College, Poona.
(3) The Nowrosjee Wadia College, Poona.
(4) The St. Xavier's College, Bombay.
(5) The Ramnarain Ruia College, Bombay.
(6) The Maganlal Thakordas Balmukundas College, Surat.
(7) The Lingaraj College, Belgaum.
(8) The Secondary Teachers' Training College, Baroda.

The following table gives the distribution of colleges, including the University School of Economics and Sociology and the University Department of Chemical Technology, and the number of students in them :—

	British Districts.		Indian States.		Sind.		Total.	
	Colleges.	Students.	Colleges.	Students.	Colleges.	Students.	Colleges.	Students.
1	2	3	4	5	6	7	8	9
Arts and Science ..	18	12,690	5	3,423	3	1,914	26	18,027
Commerce ..	2	1,340	..	..	..	..	2	1,340
Teaching ..	2	207	2	153	..	..	4	360
Engineering ..	1	243	..	..	1	201	2	444
Agriculture ..	1	199	..	..	..	..	1	199
Chemical Technology .	1	63	..	..	..	..	1	63
Law ..	5	1,756	1	211	1	167	7	2,134
Medicine ..	2	1,279	..	..	..	..	2	1,279
Total ..	32	17,777	8	3,787	5	2,282	45	23,846

There was a total increase of 3,365 in the number of students from 20,481 to 23,846 in all the affiliated colleges including the two University institutions. The number of students in the 32 colleges in the British Districts of this Province increased from 15,320 to 17,777. Of the 23,846 students, 18,027 were in the Arts and Science Colleges and 5,819 in the Professional Colleges. There is no separate college for women affiliated to the University. The number of women students in all affiliated colleges increased from 2,199 to 2,809, of whom 2,537 were in the Arts and Science Colleges and 272 in the Professional Colleges.

Provision for the annual medical inspection of students in the affiliated colleges has been made by the University since 1931. Physical training is compulsory for students in the first and second year classes in Arts, Science and Commerce colleges.

An account of the Arts and Science and the Professional colleges in this Province is given in Chapters IV and V respectively.

Receipts and Expenditure.

3(2). There was an increase in the total receipts of the University from Rs. 15,70,064 to Rs. 16,15,968, and a decrease in the total expenditure from Rs. 14,27,882 to Rs. 14,12,517. The Government grant paid to the University was Rs. 1,50,436, consisting of the annual grant of Rs. 1,17,000 and a grant of Rs. 33,436 for the Department of Chemical Technology.

Examinations.

3(3). The results of the more important University examinations held at the end of the academic year 1939-40 are given in the following table :—

Examination.	Number examined.	Number passed.				Percentage of passes.
		1st Class.	2nd Class.	Pass Class.	Total.	
1	2	3	4	5	6	7
M.A.	231	11	57	89	157	67·9
B.A. (Honours)	798	65	316	323	704	88·22
B.A. (Pass)	1,135	..	..	799	799	70·43
Inter Arts	3,280	9	278	1,981	2,268	69·1
F. Y. Arts	3,882	..	..	..	3,320	85·52
M.Sc. (By papers) (Mathematics and Physics) ..	25	3*	3	8	14	56·0
B.Sc.	749	84†	252	265	601	80·4
Inter. Science	2,152	87	663	547	1,297	60·3
F. Y. Science	3,410	..	..	..	2,633	77·21
Matriculation	23,178	..	..	..	11,892	51·3

*Includes one with distinction. †Includes 28 with distinction.

3(4). Post-graduate teaching and research work are controlled by the University in the various centres through teachers recognised for the purpose by the Syndicate on the recommendations of the Board of Post-graduate teaching. The total amount paid to research workers at various centres during the year under report was Rs. 10,087.

Post-graduate work.

3(5). The University School of Economics and Sociology had 116 students at the end of the year, of whom 40 were engaged in research. Besides these, 28 post-graduate students belonging to different colleges in Bombay attended lectures delivered in the School. Two students submitted theses for the Ph.D. degree and one for the M.A. degree. Of the 20 students who appeared for the M.A. examination by papers, 16 were successful, 5 getting the second class. Of the 28 students from other colleges who attended lectures in the school, 6 appeared for the M.A. examination, of whom 2 passed.

The University School of Economics and Sociology.

3(6). There were 40 students in the Department of Chemical Technology at the end of the year, of whom 25 took the course in Textile Chemistry and 15 the Chemical Engineering course. In addition, there were 16 research students and 7 occasional researchers. Nineteen students appeared for the B.Sc. (Tech.) examination held in March, 1940, 12 in Textile Chemistry and 7 in Chemical Engineering. Eleven of the former and all of the latter passed. Of the 18 students who passed the B.Sc. (Tech.), 10 are reported to be engaged in research and industrial investigations in the Department and 8 in industry. Graduates of this Department have continued to receive a substantial measure of assistance at the hands of industrialists, and it is reported that many of the former graduates in employment have obtained rapid preferment.

Department of Chemical Technology.

During the year under report, two theses were submitted for the M.Sc. (Tech.), two patents were applied for, 11 papers were published and 7 papers were forwarded for publication. Sir Ness Wadia has continued the fellowship of Rs. 100 per mensem for a third year for research on wetting agents.

The facilities offered by the Department in analytical work and technical investigations are now widely known, and work was received not only from places in the Province of Bombay, but also from other parts of the country. The income from this source during the year amounted to about Rs. 8,000 and the increasing amount of work has led to the expansion of the analytical section and the appointment of an additional analytical assistant.

3(7). The number of recruits enrolled at the beginning of the year was 351, and the total number embodied for training in the Camp was 637. All recruits and trained cadets were medically examined before the commencement of training. The battalion was up to establishment in officers and other ranks.

The University Training Corps.

The Commandant reports—

"A cadre course for N. C. Os. was run in June for 14 days. This "course was attended by 48 N.C.Os. and proved very valuable.

"The annual camp was held at the Deccan College buildings as no "tentage was available. A demonstration of Field Works was given "by the Royal Bombay Sappers and Miners which was of value.

"All companies could carry out company drill movements correctly. "A Guard of Honour was furnished to His Excellency the Governor "of Bombay.

"The new course as laid down in Small Arms Training, Volume 1, "Pamphlet No. 17 was fired for the first time. The standard of "shooting appeared to be satisfactory. All parts were completed "before Camp.

"Company and Battalion training was carried out in camp, including "night operations. The Signal Section and Intelligence Section "were capable of carrying out their duties during a battalion "exercise."

Foreign Universities Information Bureau.

3(8). The Foreign Universities Information Bureau is composed of the Vice-Chancellor and 7 other members representing the various branches of University education. The Bureau received 12 applications for admission to educational institutions in the United Kingdom and foreign countries, against 137 in the previous year.

During the year the Bureau received 645 personal enquiries and 930 in writing, making a total of 1,575 enquiries, against the total of 3,058 in the previous year.

The decrease in the number is due to the outbreak of War.

In regard to the enquiries made by the Bureau as to the position, during the progress of the War, of students who were already in Great Britain or who contemplated going there for study, Dr. Thomas Quayle, Secretary of the Education Department of the High Commissioner for India, sent a detailed reply and the substance of his letter is as below :—

(1) The question of the safety of sailing for England should be decided by each student personally for himself.

(2) Most of the London University schools and colleges as well as the Universities and Colleges situated in what are regarded as "evacuation areas" have been moved to "reception areas".

(3) Such students as arrive in Great Britain a month or even longer after the opening of the session will receive the most sympathetic consideration.

(4) Though students who have been offered admission for 1939-40 will receive the most sympathetic consideration for 1940-41 and even later, still students should be advised that they should not leave India until rulings in their particular cases have been obtained.

(5) Dr. Quayle will be always prepared to give all the assistance in his power to students who wish a transfer to American Universities.

3(9). Among the important events connected with the University the General. following may be mentioned :—

(*a*) The Diploma in Teaching was instituted.

(*b*) The Government of Bombay amended the recruitment rules of the Bombay Educational Services by placing degree holders of the Indian Universities on a footing of equality with those holding corresponding degrees of foreign Universities.

(*c*) A conference of a few representatives of the Bombay University and of Government presided over by the Honourable the Prime Minister was held in Poona in June, 1939, when questions involving the amendment of the Bombay University Act, 1928, were discussed. It was decided that instead of making minor amendments the question of the amendment of the Act as a whole should be considered by this Conference after the report of the University Committee appointed to examine this question, was ready.

CHAPTER IV.

Arts and Science Colleges.

4(1). The number of Arts and Science colleges in the Province of Bombay affiliated to the Bombay University remained the same, viz., 17. Of these 17 colleges, 5 are maintained by Government, 2 by Christian Missions and 10 by other Bodies. Of the 12 non-Government colleges, 10 are aided by Government and 2 are unaided.

Number of Students.

4(2). The number of students in all the Arts and Science colleges in the British Districts (excluding the University School of Economics and Sociology, an account of which has been given in Chapter III) increased by 1,786 to 12,584. Although this increase in the total number of students was shared by all communities, the most pleasing feature was the increase in the number of students belonging to the Backward classes from 116 in 1938–39 to 191 in 1939–40, which means an increase of about 64 per cent. This was apparently due to the fact that all Backward class students in Government and non-Government colleges are granted exemption from the payment of tuition fees. It is also gratifying to note that the number of women students attending the Arts colleges increased from 1,497 in 1938–39 to 1,974 in 1939–40, which means an increase of about 32 per cent. The number of students in Government colleges increased from 2,600 to 3,058, while that in the non-Government colleges increased from 8,198 to 9,526. The distribution of the number of students in all the Arts and Science colleges by communities is given in Appendix 1 of this Report.

Expenditure.

4(3). The total expenditure on Arts and Science colleges in the British Districts (excluding the University School of Economics and Sociology) increased from Rs. 26,21,390 in 1938–39 to Rs. 26,74,421 in 1939–40. It was met from the following sources :—

——	Amount.	Percentage in 1939–40.	Percentage in 1938–39.
	Rs.		
Provincial Revenues	4,71,121	17·6	19·2
District Local Board and Municipal Funds ..	250	0·0	0·0
Fees	18,68,473	69·9	60·9
Other sources	3,34,577	12·5	19·9
Total ..	26,74,421	100·0	100·0

While the percentage of the expenditure from Provincial revenues and other sources decreased by 1·6 and 7·4 respectively, the percentage of the expenditure from fees increasd by 9·0. Details of (*i*) the total expenditure on Government and non-Government Arts and Science colleges, (*ii*) the average annual cost of educating a student, and (*iii*) the cost to Government, appear in Subsidiary Form No. 1 published in the Supplement to this Report.

Grants-in-aid.

4(4). As stated in the last year's Report, the year 1938–39 was the last year of the triennium 1936–39 for which block grants were sanctioned in 1936. During the year under report, the grants payable to colleges were reassessed and the allotment for grants-in-aid was increased from Rs. 1,39,800 to Rs. 1,57,000. This amount was distributed among the 10 non-Government Arts colleges subject to a maximum of Rs. 30,000 for a college in Bombay and of Rs. 25,000 to a college outside Bombay.

Research Institutes.

4(5). In addition to these 10 Arts colleges, the Deccan College Research Institute, Poona, receives aid from Government. Government have undertaken to maintain the Institute subject to their right to increase or decrease the amount of grant-in-aid according to financial requirements. During the year under report, an amount of Rs. 64,516 was paid to the council of Management of the Institute.

Forty-two students had applied for admission to the Institute—9 for the M.A. and 33 for the Ph. D. degree. As the Institute started work rather late, only 12 students joined the Institute as under :—

1.	Indo-European Philology	4
2.	Sanskrit Literature	1
3.	Dravidian Philology	1
4.	Semitic Languages and Literature	1
5.	Proto-Indian and Ancient Indian History ..	2
6.	Sociology	3
	Total ..	12

All the members of the staff and the students were engaged in research work in their own subjects and during the short time at their disposal, about 35 research papers were published either in the Bulletin of the Institute or in such other journals.

An amount of Rs. 12,000 was also paid as a grant-in-aid for the Post-Graduate and Research Department of the Gujarat Vernacular Society, Ahmedabad, for research work in Gujarati literature.

During the year under report Government sanctioned the scheme for research work in Kannada Literature drawn up by the Committee appointed by Government in 1938. For research work in Kannada

literature Government have created a post of Director in the scale of Rs. 250—25/2—400 and to advise the Director of Kannada Research, Government have established an Advisory Board consisting of:—

(1) The Principal, Lingaraj College, Belgaum,

(2) The Lecturer in Kannada, Rajaram College, Kolhapur,

(3) One representative of the Vidya Vardhak Sangh, Dharwar,

(4) One representative of the Karnatak Historical Research Society, Dharwar,

(5) One reputed scholar in Kannada,

(6) The Lecturer in Kannada, Karnatak College, Dharwar,

(7) The Director of Kannada Research (Secretary).

During the short period of five months, the Director of Kannada Research, Dharwar, was able to establish close association with the Archæological and Epigraphical Departments that are carrying on research work in the Ancient History of India. Similarly attempts were made to enlist the co-operation of scholars in securing Kannada Literary Manuscripts lying uncared for in the possession of Maths and private individuals in villages.

The Director and his two Fellows undertook a number of tours to look for research material, and as a result, the following material was secured:—

(1) Impressions of inscriptions and one set of copper-plates	100
(2) (*a*) Palm leaf manuscripts	25
(*b*) Paper manuscripts	17
(3) Bronze and copper Jain images	45
(4) Sculptures	5
(5) Coins—Vijayanagar and post-vijayanagar period ..	100

The Director has prepared and sent two research papers for publication in the Epigraphia Indica.

Royal Institute of Science.

4(6). The Royal Institute of Science, Bombay, is the only purely Science institution in the Province of Bombay for research work in Science. Research is carried on in Physics, Chemistry, Botany, Zoology and Mathematics. The total number of students in the Institute increased from 232 in 1938-39 to 243 in 1939-40. The students were distributed as under:—

Junior B. Sc.	70
Senior B. Sc.	70
M. Sc.	81
Ph. D.	22
Total ..	243

The number of post-graduate students increased from 91 in 1938–39 to 103 in 1939–40.

Research work continued to be carried out both by the members of the staff and the post-graduate students. During the year 48 papers were published as against 52 in 1938–39. Of these, 7 were in Physics, 3 in Mathematics, 34 in Chemistry, 3 in Botany and 1 in Zoology.

The total expenditure of the Institute decreased from Rs. 1,99,378 in 1938–39 to Rs. 1,94,313 in 1939–40, and it was met as under :—

	Rs.
Provincial Revenues	84,574
Fees	30,856
Endowments	78,108
Subscriptions and other sources	775
Total ..	1,94,313

The average annual cost per student decreased from Rs. 838 in 1938–39 to Rs. 787 in 1939–40 and the cost to Government decreased from Rs. 377 to Rs. 342.

Examination results.

4(7). The following table compares the number of students who appeared and passed the B.A. and B.Sc. examinations of 1938–39 and 1939–40 and the percentage of passes :—

	1938–39.			1939–40.		
	Number appeared.	Number passed.	Percentage.	Number appeared.	Number passed.	Percentage.
B.A. ..	2,254	1,672	74·2	1,933	1,503	77·8
B.Sc. ..	722	548	75·9	745	598	80·26

A marked disparity has begun to appear between the F. Y. and the Inter. results of some of the affiliated colleges. The full details appear in the annual report of the University. It would be a serious menace to the maintenance of adequate academic standards if affiliated colleges entered into rivalry in the liberality of their F. Y. results. It is difficult to believe that 90 per cent. of the F. Y. students of our Colleges grapple successfully with the F. Y. curriculum and that the standard of teaching and of scholarship is so much higher in the mofussil than in Bombay City as the figures appear to shew.

Discipline and College life.

4(8). Discipline in all colleges was satisfactory. There was no disturbance of any kind and the relations between the staff and the students were excellent.

CHAPTER V.

Professional Colleges.

5(1). The number of Professional Colleges in this Province affiliated to the University of Bombay increased by 2, during the year under Report, by the opening of two Colleges at Belgaum viz. (1) the Government Secondary Training College, and (2) the Raja Lakhmagauda Law College. There are now in the Province 14 Professional Colleges affiliated to the Bombay University—1 for Engineering, 2 for Commerce, 1 for Agriculture, 2 for Medicine, 5 for Law and 2 for the training of Secondary teachers and the University Department of Technology. Of these, the College of Agriculture and the two Medical Colleges are under the control of the Departments of Agriculture and Medicine respectively. An account of the Department of Chemical Technology maintained by the University and classified as a Professional College is given in Chapter III.

Details of attendance, expenditure, etc. of these colleges appear in Subsidiary Form No. 1 in the Supplement to this Report.

Engineering.

5(2). The College of Engineering, Poona, is the only institution of its kind in this Province. The College provides courses for the B.E. degree and for the Diploma in Civil, Mechanical or Electrical Engineering. An account of the Diploma classes is given in Chapter IX.

The general tendency of students is to choose the Civil Engineering branch, though many take the Electrical course. To meet the increasing demand for the Civil Engineering branch, 5 additional students were admitted to the F. E. (Civil) class as in the previous year, thus raising the total number of new admissions to the College from 70 to 75.

During the year under report one woman student was admitted to the F. E. (Civil) class for the first time in the history of the College.

The usual instructional tours were undertaken during the year. The B.E. (Civil) class visited several irrigation and road works at various places in Hyderabad State, the Girna Canal System in the Nasik District and the Bridge newly constructed at Karad; the S.E. (Civil) class saw important works of various Engineering firms, the Bombay Port Trust and the Docks, etc. A Geological tour to Gokak and Belgaum was also undertaken by the students.

The B.E. Mechanicals and Electricals went on a combined tour to Mysore, Bangalore, and Shiva Samudram and other places of interest around them.

The B.E. Electricals visited important works like the G. I. P. Railway Electric Shed at Kalyan and the All India Radio Transmitter etc. at Bombay.

5(3). There are two Commerce colleges in this Province of which the Sydenham College of Commerce and Economics, Bombay, is a Government institution and the Hargovandas Laxmichand College of Commerce, Ahmedabad, is maintained by a private body.

Commerce.

The Sydenham College of Commerce and Economics received 400 applications for admission and could admit 250 only to the First Year Class. Twenty-nine graduates in Economics and 2 other eligible students joined the Junior B. Com. class in June.

During the year Government sanctioned the following proposals for the expansion and development of the activities of the college.

Arrangements have been made for Practising business men to serve on the staff to give the students some practical knowledge of Cotton Judging and of Commercial practice.

Diploma Courses in Accountancy and Secretarial Practice have been instituted. The former will meet the demand for a diploma in Accountancy of a status similar to the Government Diploma in Accountancy, and the latter the demand for training in Secretarial work. The fee is Rs. 50 per term for each Diploma course. Students taking both courses pay a fee of Rs. 75 per term only.

Special evening classes to prepare students for these two Diplomas have been started at the college. The Sydenham College Diplomas in Accountancy as well as in Secretarial Practice will be awarded to those who undergo the prescribed course of study at the college for a period of two years and pass the final examination held by the college.

Visits of observation to places of commercial and industrial importance constitute an important feature in the college courses. Such visits tend to bring students into touch with practical conditions and enlarge their general outlook. Among the places visited were the Bombay Stock Exchange, the Technological Laboratory, the Kohinoor Mills, Ltd., the office of the Bombay Electric Supply and Tramways Company Ltd., the British Tabulating Machine Company Ltd., etc.

Physical training including organised games and callisthenics continued to be an important branch of the college activities. Towards the end of the academic year inter-group tournaments were held.

The College Platoon in the University Training Corps was maintained at full strength throughout the year and continued to maintain its record for efficiency in shooting and athletics. The Principal reports that the platoon won the Guard Mounting Competition in C Company.

The Students' Union and the other students' associations in the College held debates and arranged lectures by public men.

On the employment of Commerce graduates the Principal remarks—

"It is gratifying to find that the graduates of this college continue "to be well received in business houses and their work is well appre- "ciated. However, as the number of commerce graduates goes on

"growing every year there is a possibility that all of them will not be "able to find suitable employment and there is likely to be some "unemployment among commerce graduates, although not to the "same extent as in the case of arts graduates. Perhaps one reason "for this is that the number of subjects in which students of this "college can specialize is very limited. The great majority of student "take 'Advanced Accounting and Auditing' and 'Advanced "Banking' as their special subject. There was at one time a very "good field for the employment of persons who had specialized in "these two subjects, but the number of commerce graduates has "steadily increased in recent years and it is becoming more difficult "for them to secure suitable employment. One reason for this state "of affairs is that the majority of our students qualify for the same "class of work. In my opinion the time has come when the college "should offer facilities for specialization in a greater variety of subject. "Another reason is that commercial firms do not always prefer com-"merce graduates when recruiting men to their staffs. I am trying "to interest as many business men as possible in the college and "I hope that business executives will, in future, approach me when "they require the services of capable assistants on their staffs."

The Hargovandas Laxmichand College for Commerce, Ahmedabad, maintained and conducted by the Ahmedabad Education Society was first affiliated to the Bombay University for a period of 3 years from June, 1936. During the year the College was affiliated for a further period of 5 years from June, 1939, for (*a*) the Intermediate Commerce Examination and (*b*) the B. Com. Examination in all the compulsory subjects and in the following optional subjects :—

(*i*) Advanced Accounting and Auditing.

(*ii*) Advanced Banking.

(*iii*) Organisation of Cotton Industry.

The Principal reports that at the beginning of the academic year there was rush for admission to the First Year Commerce class and he had to obtain the permission of the University to open a second division of the First Year Class. The number of students increased considerably and at the end of the year the number enrolled was 593 as against 407 in the previous year.

Agriculture.

5(4). The College of Agriculture, Poona, is under the control of the Department of Agriculture. It prepares students for the B.Sc. (Agriculture) degree examination of the University.

The Principal reports that large sums were spent during the year on the library and the college laboratories. In addition to the teaching of the degree courses the college conducts agricultural research. Thirteen post-graduate students were working of which one was studying for the Ph.D. degree, four for the M.Sc. degree and eight for the M.Sc. (Agriculture) degree.

The Revenue Officer's training class continued to function for 12 days in September, 1939, and 6 Assistant and Deputy Collectors attended the class. Eight Forest Ranger students completed their second year's course in the Forest Rangers' Training Class attached to the college. All of them passed successfully.

The Principal reports that during the year under report there were 25 members on the register of the Agricultural Graduates' Employment Board. Thirteen enquiries for employment are received from the employing agencies and these were promptly circulated to the registered members of the Board.

Medicine.

5(5). There are two Medical colleges in the Province. The Grant Medical College, Bombay, is a Government institution and is under the control of the Medical Department. The Seth Gordhandas Sundardas Medical College is maintained by the Bombay Municipality. These colleges had students studying for the M.B.B.S. course. In addition, the colleges undertake instruction in post-graduate studies and research work.

The Principal, Grant Medical College, reports that with effect from the year 1939–40, the B.Hy. course was discontinued and replaced by the D.P.H. and that there were 8 students taking instruction in Part I of the course. Fifteen candidates attended the D.O. and D.O.M.S classes. Other post-graduate classes were carried out as usual. The Annual Report of the college printed and published separately gives detailed information about the college for the year under report.

A " Refresher Course " for Registered Medical Practitioners has been organised under the joint auspices of the two colleges and associated hospitals. It is reported that this course has proved useful and was attended by 18 practitioners.

Law.

5(6). During the year under report the Karnatak Law Society, Belgaum, started a Law College at Belgaum. There are now six Law colleges affiliated to the Bombay University. Five of these are in British districts and one in Kolhapur State. The statistical details of these colleges are given in the Subsidiary form No. 1 of the Suppelment to the Report.

Owing to the introduction of the new courses of study in law since 1938, students were enrolled during the year under Report for the L.B. Examinations, some for the new and others for the old course.

Notwithstanding the revised Ordinances and Regulations governing the courses of study in Law for LL.B. Examinations, the existing Ordinances and Regulations continue to be in force till 1941. The First LL.B. Examination under the old course was held for the last time in April, 1940, and the Second LL.B. Examination will be held in April, 1941.

Under the revised regulations, candidates for the degree of LL.B. are required to pass the Inter. Arts, Inter. Science or the Inter. Commerce Examination of the University or the Inter. Arts, Science or Commerce examination of any other University or Board of Intermediate Education

recognised as equivalent to the corresponding examination of this University, and also to pass two examinations in Law, the first to be called the First LL.B. Examination and the second, the Second LL.B. Examination. Under the new regulations the first LL.B. Examination was held for the first time in April, 1939, and the Second LL.B. in April, 1940.

As a result of the conversion of the Government Law College into a full-time institution, the personnel of the Teaching staff during the year was, one full-time Principal, two full-time Professors and nine part-time Professors.

In order to meet the requirements of the full-time Law College, some additional rooms in the Elphinstone College building were placed at the disposal of the college as a temporary measure. During the year, Government selected the site for a new building for the college on the Back Bay Reclamation Area and approved the plans and estimates of the new building costing about Rs. 2,96,000. In the beginning of October, 1939, the foundation stone of the college building was laid by the Honourable Mr. B. G. Kher, the Prime Minister of the Government of Bombay.

A sum of Rs. 4,383 was spent on Law books, journals, legal magazines, etc. The Principal reports that the Law Library was kept open for longer hours than before and that this arrangement has been much appreciated by the students and subscribers. The system of lending books to selected students, including those studying for the LL.B. course and to subscribers for home reading has proved to be beneficial. It is reported that the past members of the teaching staff, other distinguish persons, Government Departments such as Legal, Educational etc. have also taken advantage of the Library.

Secondary Training Colleges.

5(7). During the year under Report one more college has been added to the list, making a total of four viz. (1) the Secondary Training College, Bombay, (2) the Secondary Training College, Belgaum, (3) the Shri Maharani Tarabai Teachers' Training College, Kolhapur and (4) the Secondary Teachers' Training College, Baroda. Of these, the first two are maintained by Government and the other two by the States concerned.

No fees were charged in the Secondary Training College, Bombay till the end of the academic year 1938–39. From June, 1939, however, Government decided to charge a tuition fee of Rs. 120 per term in both Government Secondary Training Colleges.

During the year under report 4 candidates for the M.Ed. degree were admitted to the Secondary Training College, Bombay. Thesis of one student from this college was accepted for the Master's degree.

The bi-weekly lectures for the benefit of the S.T.C. students were given by certain members of the staff and it is reported that they were popular and well attended.

It was originally proposed to start a Government Secondary Training College at Poona as part of the scheme for the revival of the Deccan College; but in deference to strong public feeling in the Karnatak, Government decided to open the college at Belgaum for the benefit of both Maratha and Kannada graduates. The college began its work in June, 1939. It has been affiliated to the Bombay University for a period of 3 years from June, 1939. The college had a full complement of students from the beginning. The college uses the Sardars' High School as its main Practising School. Arrangements have also been made for students to do some of their practice lessons under the supervision of the members of the college staff in other recognised schools in Belgaum.

The hostel attached to the Sardars' High School, Belgaum is now used for the students of this college.

CHAPTER VI.

Secondary Education.

Introduction.

6(1). In this Province the Educational Department has hitherto classified as Secondary those schools and classes in which English is taught, while in other Provinces, the figures for Secondary education include pupils in Primary Middle schools. This chapter deals with Secondary Schools for boys. An account of Secondary Schools for girls appears in Chapter XII and of European Schools in Chapter XIII. The tables at the end of the report summarise the statistics about all Secondary Schools.

Secondary Schools for Boys.

6(2). During the year under review, the number of Secondary Schools for boys rose from 584 to 631 [excluding Secondary (English) Schools] and the number of pupils from 116,134 to 128,523 i.e., 10·7 per cent. The following table shows the distribution of these schools and the number of pupils by divisions :—

Division.	Number of Schools.			Number of Pupils.			Percentage increase in the number of pupils during the year.
	High Schools.	Middle Schools.	Total.	In High Schools.	In Middle Schools.	Total.	
1	2	3	4	5	6	7	8
Bombay Division ..	107	102	209	40,532	9,754	50,286	11·7
Central Division ..	61	79	140	23,609	4,941	28,550	7·3
Northern Division	69	130	199	29,040	6,620	35,660	10·7
Southern Division	39	44	83	11,695	2,332	14,027	14·0
Total ..	276	355	631	104,876	23,647	128,523	10·7

Of the 128,523 pupils in Secondary Schools for boys 59,017 (or a percentage of 45·9) were in the High School stage and 69,506, or 54·1 per cent. in the Middle school stage. The number of candidates from the British Districts in this Province who sat for the Matriculation examination in 1940 was 15,504, of whom 8,002, or 51·6 per cent., passed.

The following table compares the distribution of Secondary Schools by Management :—

—	Number of Schools.			Number of Pupils.			Percentage increase or decrease in the number of pupils.
	High Schools.	Middle Schools.	Total.	In High Schools.	In Middle Schools.	Total.	
1	2	3	4	5	6	7	8
Government ..	19	2	21	5,737	303	6,040	— 9·3
District Local Board ..	..	134	134	..	4,195	4,195	+ 7·5
Municipal ..	24	37	61	7,639	2,613	10,252	+11·3
Aided ..	221	141	362	85,936	14,205	100,141	+14·5
Unaided ..	12	41	53	5,564	2,331	7,895	—11·1
Total ..	276	355	631	104,876	23,647	128,523	+10·7

The increase in the attendance at Local Board, Municipal and Aided Schools exceeds the decline in attendance at Government and Unaided Schools. More schools have now been brought on the aided list, and the fall in the number of pupils attending Government schools is the result of the policy of Government to turn the Boys'. Secondary Schools into Training institutions, Girls' Schools or Vocational High Schools.

The following table classifies by communities the boys attending Secondary Schools :—

—	1938-39.	1939-40.	Percentage of increase.
1	2	3	4
Hindus .. Advanced	58,867	65,201	10·8
Hindus .. Intermediate	29,917	32,655	9·2
Hindus .. Backward	3,378	3,969	17·5
Hindus .. Total ..	92,162	101,825	10·5
Muslims	10,286	11,547	12·3
Parsis	4,274	4,350	1·8
Others	9,412	10,801	14·8
Grand Total ..	116,134	128,523	10·7

There has been a gratifying increase in the number of pupils belonging to all communities but the most striking increase is in the Backward Hindu classes which is 17·5, against 14·6 for the preceding year—a tribute to the success of Government's efforts to stimulate education among the Backward classes.

Expenditure.

6(3). The total expenditure of all Secondary Schools for boys rose by Rs. 4,65,173, or 7·4 per cent., to Rs. 67,87,270. It was met from the following sources :—

——	Expenditure.	Percentage.
	Rs.	
Provincial Revenues	12,49,784	18·4
District Local Board and Municipal Funds ..	1,67,527	2·5
Fees	43,88,400	64·6
Other Sources	9,81,559	14·5
Total ..	67,87,270	100·0

Of the total expenditure of about Rs. 68 lakhs, the expenditure on Government schools was over 6 lakhs, or 9 per cent., of which Rs. 2·1 lakhs, or 33·9 per cent., was met from fees.

The following table compares the average cost per pupil for two years :—

1	1938–39.		1939–40.	
	Total cost. 2	Cost to Government. 3	Total cost. 4	Cost to Government. 5
	Rs. a.	Rs. a.	Rs. a.	Rs. a.
Government	108 1	70 12	104 13	68 4
Board	37 6	5 3	35 11	4 12
Aided	51 2	7 15	50 15	7 12
Unaided	69 8	....	67 14	....
Total ..	54 2	10 9	52 12	9 11

It will be seen from the table above that the total annual average cost per pupil in an ordinary Secondary School decreased from Rs. 54-2 to Rs. 52-12 and the average cost to Government from Rs. 10-9 to Rs. 9-11. As has already been reported in previous years, the decrease is due, to some extent, to an increase in the number of pupils. This is a normal development which it is possible to regard with complacency. Another contributory factor has been a progressive reduction in teachers' salaries, which cannot fail ultimately to have a deleterious effect on the progress of education. Comparisons of the cost to Government of educating a pupil in a Government school with that in an aided school have elicited criticism of Government institutions. It is worth remembering, however, that the former Government salary-scales have done the Province a very necessary service by encouraging some of the abler products of our University to take to teaching. Another cause for the difference is Government's generous policy of admitting to their own schools large numbers of the privileged classes either free or at greatly reduced fee rates.

Special facilities.

6(4). The special facilities provided by Government for pupils of the various communities attending Secondary Schools include freestudentships, scholarships, fee-grants, remission of room-rent in hostels, etc. Freestudentships in Government Secondary Schools are admissible for 5 per cent. of the pupils of the Advanced classes, 22·5 per cent. of the pupils of the Intermediate classes, 75 per cent. of the pupils of the Backward classes, and 20 per cent. of the Muslim pupils. Under the scheme of freestudentships, the total financial liability of Government is limited to 16·6 per cent. of the number of pupils in Government Schools in each Division.

In addition to the freestudentships available for the Backward classes (including Scheduled classes) pupils of the Scheduled classes are admitted free provided they are otherwise eligible. Provision also exists for the admission for children of the Konkani Maratha communities, Indian soldiers and followers, and school mistresses, the financial loss sustained by non-Government schools on this account being made good to them by Government by the payment of fee-grants. The expenditure to Government on this account amounted to Rs. 34,850 during the year. In addition, several sets of special scholarships have been provided by Government tenable in High and Middle schools for pupils belonging to the non-Advanced communities.

To enable pupils of various communities to gain admission, Government have fixed a certain percentage to enable the schools to deal fairly with all applications.

6(5). The following table gives the total number of men teachers in Secondary Schools for boys and girls during the year 1939–40: —

Teachers.

	Total number of teachers.	Trained teachers.		Graduates.	
		Number.	Percentage.	Number.	Percentage.
1	2	3	4	5	6
Government	337	189	56·1	266	78·9
District Local Board and Municipal	642	138	21·4	233	36·3
Aided	5,370	1,094	20·4	2,687	50·0
Unaided	480	66	13·8	212	44·2
Total—Non-Government ..	6,492	1,298	20·0	3,132	48·2
Grand Total ..	6,829	1,487	21·8	3,398	49·8

The total number of men teachers was 6,829, an increase of 613 over the preceding year. There were in service, as teachers, 304 more graduates and 96 more professionally trained men than in the previous year, The percentage of professionally trained teachers in non-Government Schools rose from 19·6 to 20·0, maintaining the steady increase in the number of teachers of superior qualifications. Apart from the Training Colleges preparing candidates for the B. T. degree, teachers also receive some professional training in recognised training classes, which prepare teachers, mostly non-graduates, for the Secondary Teachers' Certificate Examination. The opening of training classes for Secondary Teachers' Certificate candidates will, it is hoped, produce better teachers than have been hitherto available. In these classes candidates receive lectures on educational psychology and methods, and observe demonstration lessons.

Government Schools.

6(6). The number of Government Secondary schools for boys decreased from 22 to 21, the Sorabji J. J. High School, Surat, having been converted into a Primary Training Institution for Men. Of these, 19 were High Schools and 2 Middle Schools. The Anglo-Urdu School, Sholapur, was raised to the status of a High School during the year.

Government have had under their consideration the question of introducing vocational training in Secondary Schools. After a careful survey of the position and after consulting the Board of Secondary

Education and the local opinion, Government decided in the year under review to convert gradually five of their High Schools into Vocational Schools as follows :—

(1) The R. C. High School, Ahmedabad, into a Commercial High School.

(2) The Northcote High School, Sholapur, into a Technical High School.

(3) The Government High School, Satara,
(4) The Government High School, Bijapur, } into Agricultural High
(5) The Telang High School, Godhra, Schools.

According to the plan for the introduction of vocational training approved by Government, a vocational bias was introduced in standard IV of these schools in June, 1939, and all the higher standards will be brought gradually under the vocational scheme year by year.

In view of the recommendation made by the Committee on the training of Primary teachers, Government decided to convert the Government High Schools at Surat, Ratnagiri and Nasik into Primary Training Institutions. According to this decision the Surat High School, as stated above, was wholly converted into a Training College for Men, some of the classes in the Ratnagiri High School were closed and a Training Institution for Men with four classes (two 1st year and two 2nd year) was opened, and the classes in the Nasik High School were reduced to prepare the way for a Training College for Women from June, 1940. To meet the growing demand for Girls' Secondary education at Dharwar, Government decided to close gradually the Government High School at the place and to develop the Anglo-Kannada Girls School into a full-fledged High School.

The Government Secondary Schools continue to maintain their general level of efficiency and their popularity. They now occupy an important place in the system of Secondary education in this Province with the introduction of a vocational bias.

Other Schools.

6(7). The number of recognised Secondary Schools rose by 60 from 701 to 761. The number of non-Government High Schools was 245 and of Middle Schools 312. Of the non-Government recognised schools, 134 schools were under the control of District Local Boards and 24 High Schools and 37 Middle Schools under Municipalities. The rest were under private management.

To distribute financial aid on an equitable basis to all recognised schools Government introduced a scheme to limit grants-in-aid to 20 per cent. of the admitted expenditure in the case of the Boys' schools and to 25 per cent. in the case of the Girls' schools. The scheme sanctioned is to be fully operative within three years from 1938–39. It is premature to estimate the results of the scheme at this stage.

Government, in response to an oft-voiced request, inaugurated this year a Provident Fund subsidised by Government for the benefit of Secondary teachers. Provision for old age is essential and a teacher

cannot be expected to devote himself whole-heartedly to the welfare of his pupils unless he is assured of adequate provision for old age. The institution of a Provident Fund, it is hoped, will stabilise the position of teachers in non-Government Secondary Schools and will create in them an abiding interest in their professional work.

Courses and Examinations.

6(8). Secondary Schools follow generally the courses of studies laid down for the various standards in Schedule D of the Grant-in-aid Code. Schools are, however, allowed to modify the courses with the previous approval of the Department. The standards followed in Secondary (English) Schools are those laid down in Schedule C to the Grant-in-aid Code. The question of evolving courses of studies common to both Secondary Schools and Secondary (English) Schools is before Government.

Secondary Schools in this Province for the present prepare candidates for the Matriculation examination only but the question of instituting a general Secondary School Leaving Certificate Examination to serve the requirements of the University and Secondary education generally is before Government.

Boy Scouts.

6(9). During the year under report the Hindustan Scout Association, Bombay Province, was paid a grant of Rs. 21,700. The number of scouts on the roll of the Association was 32,525.

The original Boy Scouts Association was readmitted to Government grant and a grant of Rs. 1,000 was paid to the Association during the year under review. The total number of scouts and scouters of all ranks recorded by the Association in this Province during the year, was 12,000.

Schools are now at liberty to affiliate their scout-troops to either of the Associations and the expenditure incurred by aided schools on scouting is admitted for the assessment of the Government grant for Physical education.

Physical Education.

6(10). Government maintain a Training Institute for Physical Education at Kandivli mainly to train specialist teachers in Physical education which is now compulsory for all pupils. An account of the institute is given in Chapter IX of this Report.

Special grants-in-aid to Secondary Schools for Physical education continued to be paid as in the previous year.

Medical Inspection of School Children.

6(11). The work of medical inspection of pupils in Government Schools is entrusted to Government medical officers, who receive a small honorarium for the work. Expenditure incurred by non-Government Secondary Schools on medical inspection is held admissible for the purposes of Government grant for Physical education.

The question of placing the system of medical inspection of school children on a uniform and general basis is being considered.

Text Books and the School Book Committees.

6(12). The five School Book Committees for regional languages and the Provincial Board for Education in Hindustani continued to function during the year under report. A detailed account of these Committees is given in the Chapter on Primary Education.

The Provincal School Book Committee, of which the Director of Public Instruction is the President, considers books intended for Secondary Schools. The number of books considered by this committee during the year is given in the table below :—

Number of Books received including the opening balance.	Number of Books disposed of		Books sanctioned as			Balance.
	Sanctioned.	Rejected.	Text Books.	Pupils' Library Books.	Teachers' Library Books.	
1	2	3	4	5	6	7
244	186	11	62	105	19	47

Secondary (English) Schools.

Schools and Pupils.

6(13). There was no change in the total number of Secondary (English) Schools which was 41, but the number of pupils in them increased by 1,144 to 16,925 (10,236 boys and 6,689 girls). Of these 41 schools, 39 are aided by Government. The following table gives details of these schools and the pupils attending them :—

—		Schools.	Pupils.
High Schools for	Boys	16	9,716
	Girls	12	5,167
Middle Schools for	Boys	4	550
	Girls	9	1,492
	Total ..	41	16,925

Expenditure.

6(14). The total expenditure on Secondary (English) Schools increased by Rs. 1,22,610 to Rs. 13,42,214, which was met from the following sources :—

	Amount.	Percentage.
	Rs.	
Government Funds	2,26,152	16·9
Fees	8,78,277	65·4
Other Sources	2,37,785	17·7
Total ..	13,42,214	100·0

Teachers.

6(15). The number of trained teachers in Secondary (English) Schools during the year under report was 363 (140 men and 223 women). The average pay of teachers in Secondary (English) Schools was Rs. 80–2–0 per mensem. The St. Margaret's Training College, Bombay, and the Secondary Teachers' Certificate class attached to the St. Sebastian Goan High School, Bombay, continued to prepare candidates for the Secondary Teachers' Certificate Examination. Both these institutions are recognised by the Department.

The most important event affecting these schools is that Government decided after a full investigation of the position that there was no justification for granting the Primary departments of these schools the same aid as the departments of ordinary Secondary Schools. Government have accordingly directed that the Primary departments of these schools (Standards I—IV, including classes maintained below Standard I) should from the year 1940–41 be treated as "Primary" and recognised and aided by the Local Authorities concerned in the usual manner. They should cease to receive aid directly from Provincial funds as Secondary Schools.

CHAPTER VII.

PRIMARY EDUCATION.

Schools and Pupils.

7(1). The year under report shows an increase of 2,680 in the number of Primary schools and of 177,788 in the number of pupils enrolled—an increase shared by all the Divisions. On 31st March, 1940, there were 19,115 Primary schools in the Province with an attendance of 1,500,456 pupils. The following table compares for the last two years the number of schools and pupils by managements :—

		Number of Schools		Number of pupils	
		1938-39	1939-40	1938-39	1939-40
Government	Boys	30	27	5,373	4,341
	Girls	10	12	1,233	1,403
District Local Board	Boys	8,840	9,145	641,797	686,400
	Girls	750	758	55,744	62,266
Municipal	Boys	1,101	1,143	253,485	279,682
	Girls	536	547	109,634	121,444
Aided	Boys	4,607	7,053	215,341	308,321
	Girls	243	289	24,467	27,438
Unaided	Boys	293	129	13,840	7,868
	Girls	25	12	1,754	1,293
Total	Boys	14,871	17,497	1,129,836	1,286,612
	Girls	1,564	1,618	192,832	213,844
	Total	16,435	19,115	1,322,668	1,500,456

The transfer of the aided Industrial School at Jalgaon to the Criminal Tribes Settlement in the East Khandesh District and the closure of two Government Primary schools in the Southern Division account for a decrease of one in the number of Government Primary schools, while the increase of 53 in the number of Municipal schools is due to the opening of new schools.

There was an increase of 313 in the number of District Local Board schools, of which 25 are in villages with a population of over 1,000 and the rest in villages with a population of 700-1,000. Government made a special provision of Rs. 1,00,000 to aid Local Boards to provide schools in villages with a population of 700–1,000. The response from Local Boards has been encouraging and in a year or two, it is hoped, all the large villages in the Province with a population of 700 and over will have a school.

Private enterprise has added 2,492 new aided Primary schools under the scheme for the removal of mass illiteracy. Government provided Rs. 9½ lakhs for the extension of the scheme and though various considerations hindered the public from taking full advantage of this provision, the response made cannot be called unsatisfactory. The registration rules framed for these schools originally contemplated payment of a direct grant only in the first year of their existence. Government's decision now to continue payment of grants direct to schools in villages with a population of less than 700, has created in the public mind an atmosphere of confidence and stability which promises well for the future. The extension of the scheme seems to promise a gradual expansion of Primary education without unduly straining the financial resources of the Boards or the State.

The average area served by a boys' Primary school declined from 5·2 to 4·4 square miles, and there was one school for every 1·2 towns and villages, against 1·5 in the previous year. Of the total male population, 11·9 per cent. was under instruction in Primary schools, as against 10·6 in the preceding year.

There are 21,688 inhabited towns and villages in the Province, of which 13,358, or 61·6 per cent., have schools, an increase of 1,496 during the year. On 31st March, 1940, there were only 33 villages with a population of 1,000 and over without schools, as against 58 in the previous year, and it is hoped that in a year or two no such village will be without a school. Though only 61·6 per cent. of the villages are provided with schools, it must be remembered that many villages which have no school of their own can take advantage of schools within easy reach, and moreover, a number of these so-called villages are nothing but scattered hamlets. Details of villages with and without schools will be found in Appendix IV to this Report.

Stages of Instruction.

7(2). The following table gives the distribution of pupils in Primary schools by standards :—

1	Boys. 2	Percentage to total. 3	Girls. 4	Percentage to total. 5
Infants	405,225	36·6	180,630	45·7
Standard I	200,586	18·1	71,566	18·1
Standard II	155,838	14·1	53,085	13·5
Standard III	126,872	11·5	39,083	9·9
Standard IV	104,677	9·5	28,020	7·1
Total—Lower Primary Stage..	993,198	89·8	372,384	94·3
Standard V	50,599	4·6	11,696	2·9
Standard VI	32,763	3·0	6,968	1·8
Standard VII	28,928	2·6	3,920	1·0
Total—Upper Primary Stage..	112,290	10·2	22,584	5·7
Grand Total—Lower and Upper Primary Stages ..	1,105,488	100·0	394,968	100·0

Expenditure.

7(3). The expenditure on Primary education increased by Rs. 8,06,840 to Rs. 2,00,00,076. The sources from which it was met during the year under report and the year preceding are given below :—

1	1938–39. Amount. 2	1938–39. Percentage. 3	1939–40. Amount. 4	1939–40. Percentage. 5
	Rs.		Rs.	
Government funds ..	1,16,16,611	60·5	1,22,22,124	61·1
Board funds	54,03,198	28·2	55,32,444	27·7
Fees	7,73,685	4·0	8,02,424	4·0
Other sources	13,99,742	7·3	14,43,084	7·2
Total ..	1,91,93,236	100·0	2,00,00,076	100·0

The total expenditure on Primary schools increased by about Rs. 8 lakhs, but over Rs. 6 lakhs of this came from Provincial funds. The expenditure under the other heads recorded only minor increases. The increase of Rs. 6 lakhs in the Provincial expenditure was due mainly to the grants paid to schools opened under the scheme for mass literacy, and partly to the payment of non-recurring block grants to Local Authorities on their admissible but unsanctioned expenditure and the payment of duty pay to teachers under training.

The average cost of educating a pupil in a primary school for boys by different managements will be found in Subsidiary forms Nos. 4 and 5 printed in the Supplement to this Report. The total average cost per pupil for all managements fell from Rs. 13-14-0 to Rs. 12-14-0 and the cost to Government from Rs. 8-14-0 to Rs. 8-5-0. The opening of a large number of aided Primary schools was responsible for the reduction in the average cost per pupil.

Fees.

7(4). Fee receipts increased by Rs. 28,739 to Rs. 8,02,424 representing 4·01 per cent. of the total expenditure on Primary schools. This increase is not proportionate to the increase in the number of Primary schools, as most of them were voluntary schools under the mass literacy scheme and charged low fees or none at all.

Buildings.

7(5). Appendix V gives particulars of the housing arrangements for District Local Board, Municipal and Aided Primary schools for boys and girls in the Province, and shows that 24 per cent. of the boys' schools and 23 per cent. of the girls' schools have their own buildings, while 47 per cent. of the boys' schools and 14 per cent. of the girls' schools are in rent-free buildings, temples, chavdis, etc. Again, 24 per cent. of the boys' schools and 60 per cent. of the girls' schools are in rented buildings, the rest of the school-houses being partly owned and partly rented.

The District Building Committees established in 1938 continued to function satisfactorily during the year. Government provided for these Committees Rs. 5 lakhs which have been well utilised. Fifty-one school houses were actually completed during the year, and it is reported that 81 were under construction. It is hoped that as time goes on buildings will be constructed more rapidly.

The District Local Boards, Ahmednagar and East Khandesh, carried on their usual annual programme, erected a few buildings of their own and extended more than 10 buildings.

Under the Sheth Mangaldas Girdhardas Cheap Building Fund Scheme for the Ahmedabad District, 7 buildings were constructed at a total cost of about Rs. 13,000, and under the Sir Purshottamdas Thakurdas Building Scheme in Surat 6 new buildings were constructed and extentions made to two at a cost of nearly Rs. 34,000. Eight buildings were also under construction for the backward areas of the Surat District. The Purshottamdas Thakurdas scheme has been extended also to the Panch Mahals, where one building was put up during the year.

Teachers.

7(6). The total number of teachers in Primary schools under all managements rose by 4,176 (10·5 per cent.) to 43,993. Of these, 37,201 were men and 6,792 women. Although the number of trained teachers rose by 189 to 18,230, the percentage of trained teachers to the total number of teachers fell from 45·3 to 41·4. This was due, as in the previous year, to the large number of untrained teachers employed in the voluntary schools started during the year. The total number of teachers in Government, District Local Board and Municipal Primary schools for boys and girls will be found in Appendix VIII to this Report.

The expansion of the Government Training institutions and the financial encouragement now extended to private Training institutions will, it is hoped, increase the trained element appreciably at least in District Local Board schools.

Pay of Primary teachers.

7(7). The pay of Primary teachers in the Province remained unchanged. Towards the end of the year, however, to remove anomalies in the pay of teachers trained after April, 1935, Government directed that they should get either the old scale (*plus* increments for periods spent in training) or the minimum pay for new entrants, whichever was greater. Government also accepted the recommendation of the Moos-Paranjpe Committee in regard to the Head Masters' and First Assistants' allowances which had been withdrawn. These allowances were recommended to be continued in the form of personal pay in the case of those teachers who were getting them, or were entitled to get them, for a full year prior to 1st April, 1939, and merged in their future increments. This has helped to remove discontent among a section of the teachers, but though some Local Authorities have agreed to grant personal pay to the affected teachers, others have refused to do so. Government are doing all that is possible to persuade the Local Authorities to grant personal pay to their employees.

The whole question of the pay-scales of teachers is under consideration, and it is hoped that a satisfactory solution will soon be found when Government issues orders on the recommendations of the Moss-Paranjpe Committee.

The Shift System.

7(8). Many Local Authorities have adopted the shift system. Detailed comments have been made on this aspect of Primary education in the last year's Report. The shift system is yet in an experimental stage and it is too early to estimate its practical utility. It has prevented over-crowding and has, to a certain extent, solved the difficulties of accommodation and additional assistants. Whatever the objections, the shorter hours of work prescribed for the Infants class and standard I, to which standards the shift system is generally confined, cannot be regarded as prejudicial to the progress of the children for whom the longer school session is not absolutely necessary.

7(9). The draft revised syllabus referred to in the previous year's Report continued to be successfully followed in the Practising schools of Training institutions. It seems to give a more realistic and practical turn to every day teaching. Children take a keen interest in the various occupations included in the syllabus. Government, therefore, decided to extend the revised syllabus to all Primary schools from June, 1940, and to begin with, to introduce it in the Infants class and standard I. As more and more trained teachers handling the new course issue from the Training institutions, it is hoped the revised syllabus will bear fruit.

Courses of study.

A simplified course for the use of small village schools has also been sanctioned.

Government have introduced Basic education in 88 schools in the Province. Compact areas were selected for the purposes of this experiment on a linguistic basis as shown below:—

One in the Surat District for Gujarat.

Two in the East Khandesh and Satara Districts for Maharashtra, and

One in the Dharwar District for the Kannada speaking population.

The teachers of these schools received special training at the Basis Training Centres. The Basic craft selected is spinning and carding. Weaving is to be introduced at a later stage. It is too early to judge of the results of the experiment, but it is becoming more and more evident that in the absence of text-books and other teaching aids the teachers find it extremely difficult to handle the course laid down. The Basic syllabus also seems to need revision in the light of the experience gained. The question of using other crafts, in addition to spinning and carding, is engaging the attention of the Department.

Government appointed in January, 1939, an Advisory Committee for Basic education to advise them on—

1. questions relating to the training of teachers and supervisors for Basic schools;
2. the location of Basic schools in the Province, and
3. questions relating to the courses of study to be followed in the Basic schools.

The Committee held three meetings during the year and made recommendations to Government on various problems connected with Basic education.

The First All-India Basic Education Conference met in Poona in October, 1939, at the invitation of the Government of Bombay. The Conference enabled workers in the field of Basic education in the several Provinces to meet and discuss the results achieved. As the dates of the Conference synchronised with the meeting of the Central Advisory

Board of Education which was also held at Poona, the Basic Conference was visited by several Ministers of Education and Directors of Public Instruction from other Provinces.

This year saw the introduction of Hindustani in the upper standards of Primary schools. This has led to some controversy particularly in regard to the text-books prescribed for use, and Government are considering the question of making suitable changes in their original orders to meet the objections.

Education of the Agricultural classes.

7(10). The number of Agricultural bias classes during the year remained as before, namely 79, but they recorded an increase of 459 pupils, bringing the total number under instruction to 3,618. The syllabus for these classes is generally well-planned and the work done in them has a practical demonstrative value for the Agricultural communities. It is, however, reported that the classes are unpopular in the Northern Division and the Konkan Districts of the Bombay Division.

Examinations.

7(11). The resumption of full control of the Inspecting staff by Government has radically changed the whole system of inspection and examination in Primary schools. The examination work of Primary schools is now organised by the School Board Administrative Officer in consultation with the Senior Assistant Deputy Educational Inspectors, and with the co-operation of the Government Inspecting staff. The examinations of big taluka schools or full Primary schools are left to the Headmasters concerned, while the examinations of the smaller schools are entrusted to selected Headmasters. At the time of the inspection of the schools, Government Inspecting Officers have to scrutinise the examination results of the schools concerned and this acts as an effective check against injudicious promotions.

During the year under report, as stated elsewhere, an additional standard (VII) was added to girls' schools to raise gradually the standard of teaching in girls' schools and bring it on to the level of the standard in boys' schools. The first examination for girls under the new course was held in 1940, a separate examination being held for girls who had failed under the old course. It is hoped ultimately to hold a common examination for both girls and boys. As however the change must evolve graudually, the present practice of holding separate examinations for boys and for girls will continue up to 1942, when the position will be reviewed.

The number of candidates for the Primary School Leaving Certificate Examination is increasing from year to year. In the year under report 32,000 children were examined, showing an increase of 1,071 candidates over the preceding year. The following table gives details of the Examination held in 1939-40 at the various centres :—

—		Primary School Leaving Certificate Examination with

Physical Education.

7(12). Physical education has assumed the importance legitimately due to it in any scheme of secular education. Organised efforts are being made to encourage physical instruction in Primary schools. Indigenous games and mass exercises of national origin are fostered and developed in the schools. Teachers specially trained in physical culture, whenever available, have charge of regular drill in the schools. Most Local Authorities have also well-organised Boy Scout and Girl Guide movements of their own.

Physical education has thus become an integral part of instruction in the Primary schools. The expenditure of Local Authorities in purchasing apparatus for physical exercises, on scouting, camping, and medical inspection of school children is admitted for a Government grant just as any other item of Primary education. A regular syllabus in physical education has also been incorporated in the revised syllabus for the Primary schools introduced from June, 1940.

In each Division, two Assistant Deputy Educationsl Inspectors for Physical Education have been appointed and it is part of their duty to inspect the Physical training in Primary schools and, where possible, to organise short-term training courses for Primary teachers.

School Co-operative Societies.

7(13). The number of School Co-operative Societies increased during the year by 20 to 664. These societies are managed by the pupils themselves under the guidance of the teachers and demonstrate to growing minds the importance of self-help, co-operation and thrift.

School Libraries.

7(14). School libraries play an important part in the growth and development of the children in our Primary schools. Besides giving the pupils opportunities for reading outside the regular prescribed course, libraries foster in the pupils a taste for reading which endures after they leave school and prevents their lapsing into illiteracy. Financial considerations have been largely responsible for the lack of proposed library facilities in a majority of Primary schools. But there are notable exceptions. The East Khandesh District maintains 77 libraries for school children, and 25 central libraries for its teachers; Ahmednagar and Sholapur Municipalities maintain a few libraries for their school children and their teachers. The Surat District is particularly fortunate in the possession of 390 libraries under the Sir Purshottamdas Circulating Bal Library Scheme. There are also 8 other circulating libraries in the District. In the Panch Mahals District popular contributions have established a few village libraries.

School Book Committees in the Regional Languages.

7(15). A School Book Committee for each of the regional languages and the Provincial Board for Education in Hindustani advise the Department on the suitability of books for use in schools. The work done during the year under report by the four Committees and the Board is tabulated below :—

1	Number of books received including the opening balance. 2	Number of books disposed of.		Balance. 5
		Sanctioned. 3	Rejected. 4	
Urdu School Book Committee ..	159	138	12	9
Marathi School Book Committee ..	304	261	43	..
Gujarati School Book Committee ..	474	359	43	72
Kannada School Book Committee ..	130	122	7	1
Provincial Board for Education in Hindustani	139	46	22	71
Total ..	1,206	926	127	153
Total for 1938–39 ..	844	558	51	235

This year Government ordered that all the Departmental books in use in the Primary schools in this Province should be removed from the list of text-books and the contract for the publication of these books terminated. In the place of those books that were being generally used, the School Boards were asked to use other books on the sanctioned list. As the question of text-books was an important one, Government called a small informal conference, to which some non-official educationists were also invited, and the problem was discussed. As a result of this informal conference, Government appointed in June, 1939, a Special Committee with Mr. D. C. Pavate, Educational Inspector, Central Division, as Chairman, to consider the whole policy in regard to text-books in schools and advise Government on the preparation, publication and sale of suitable text-books for the schools. The Committee had not concluded its deliberations by the end of the year.

Bombay Municipal Corporation.

7(16). The total number of Primary schools for boys and girls in Bombay City, both Municipal and approved, increased by 19 to 551 and the number of pupils in them increased by 20,114 to 135,300. Of these, 7,463 were in the Upper Primary stage and the rest, namely, 127,837 in the Lower Primary stage, as against 6,528 and 1,08,658 respectively in the preceding year.

There were 2,803 ordinary teachers in the Municipal schools for boys and girls, as against 2,384 in the preceding year. Of these, 1,542, or 55 per cent., were trained, 1,132, or 40·4 per cent., qualified and 129, or 4·6 per cent., unqualified. The percentage of trained teachers increased by 0·8.

The number of special teachers for Drawing, Music, Drill, etc., stood unchanged at 130.

The total direct expenditure on Primary schools, both on Municipal and approved schools, was Rs. 44,12,433, as against Rs. 41,89,671 in the preceding year. The Corporation received a maintenance grant from Government of Rs. 8,95,000 in respect of its expenditure of Rs. 34,94,214.

Cantonment Schools.

7(17). The six Cantonments in this Province have made adequate provision for the educational needs of their residents. They either maintain their own schools or pay grants to approved schools and all these schools are inspected by Government Inspecting Officers. Particulars of these schools, the number of pupils, the expenditure incurred, etc., will be found in Appendix VI to this Report.

Compulsory Education.

7(18). The Bombay Municipality this year extended compulsion to wards A to E and has thus introduced compulsion in all wards of the City. Eight other Local Authority Municipalities and two District Local Boards have introduced complete or partial compulsion. A table summarising the effects of the introduction of compulsory elementary education on the number of children attending schools in those areas appears as Appendix VII to this Report.

The progress revealed by the figures leaves much to be desired. Some of the Municipalities appear to be now making an effort to enforce compulsion. The absence of figures of coercive measures of the Bombay Municipality shows that so far the Municipality has done very little to enforce compulsion.

The unwillingness of Local Authorities to resort to coercive measures under the Act is mainly responsible for the unsatisfactory progress shown. The necessity of taking such measures has been duly impressed on the Local Authorities and the various officers concerned.

Government had made during the year a special provision of Rs. 3 lakhs for financing schemes of compulsion, but, owing to the absence of any proposals, the provision remained unutilised except for a small amount of Rs. 655 paid to the Dharwar Municipality for its scheme for the Bazaar Lines.

Working of the Primary Education Act.

7(19). There are manifest signs of improvement in almost all directions. The bifurcation of Administration and Inspection has perceptibly improved the work of the Primary schools. The further strengthening of the Inspecting staff during the year has made it possible to increase

and intensify inspection and to watch and guide the work of teachers. The teachers themselves under the new order of things have much greater peace of mind and security of tenure than in the past, and this has had a salutary effect on their work generally.

On the other hand, the work of the School Boards was not free from friction owing to the Administrative Officer having definite powers in his hands independent of the School Board. Occasionally, Administrative Officers were charged with having non-co-operated with the Board, mainly because in the discharge of their duties, they did not find it possible to comply with the wishes of the members of the Board. School Boards are jealous of their own powers and unfortunately display suspicion of the actions of the Administrative Officer and the executive orders issued by the Department. It is hoped that as time goes on things will settle and there will be greater co-operation between the School Board and the Administrative Officer.

On the whole, however, the School Boards have continued to evince considerable interest in the various schemes relating to the expansion of Primary education; viz., the opening of new schools, the introduction of the new syllabus, physical training, school buildings and the innumerable other activities that the reorganised scheme of Primary education has ushered in.

At the time of the All-India Basic Conference as all interested in Primary education were in Poona, the Department took the opportunity of holding a Conference of the Chairmen of School Boards and the Inspecting Officers of the Department to discuss general problems arising out of the amended Primary Education Act. The Conference served a useful purpose in removing some of the misunderstanding that there was regarding the powers and privileges of Administrative Officers and Chairmen, and it is hoped to hold such Conferences periodically.

Provincial Board of Primary Education.

7(20). During the year under report, Government appointed a Provincial Board of Primary Education for the Province as contemplated in section 2 A of the Bombay Primary Education Act, 1923. As it was constituted fairly late in the year, the Board could meet only twice during the year. Useful suggestions, however, were made by the Board in regard to building grants to approved Primary schools, school hours, play grounds, educational survey of the Province, etc.

CHAPTER VIII.

Training of Teachers.

I. *Training of Secondary School Teachers.*

There are in all five institutions (including two in Indian States) for the training of graduate teachers of Secondary schools of which one is an institution for Physical Education. Of these, three are Government institutions and are dealt with in Chapters V and IX. Besides these Training colleges there are two normal schools which train mistresses for European and Secondary (English) schools, and an account of them is given in Chapter XIII.

II. *Training of Primary School Teachers.*

Institutions.

8(1). The Primary Training institutions increased from 27 to 37, of which 17 are Government, 3 Municipal and 17 aided. Of these, 20 are for men and 17 for women. The following table gives comparative figures for the last two years of the number of students trained :—

	1938–39.			1939–40.			Increase.
	Government.	Non-Government.	Total.	Government.	Non-Government.	Total.	
Institutions for men .	881	171	1,052	1,777	569	2,346	1,294
Institutions for women ..	307	557	864	333	834	1,167	303
Total ..	1,188	728	1,916	2,110	1,403	3,513	1,597

During the year under report ten new institutions were started and the existing Training institutions, both Government and non-Government, were considerably expanded. There has, therefore, been a large increase in the number of students attending these institutions, the total number under training being 3,513, showing an increase of 1,597. Of the 3,513 students under training 2,616 (including 158 students of the Scheduled classes) were Hindus, 374 Muslims, 431 Indian Christians, and 92 others.

Of the ten newly started Training institutions eight are for men and two for women. The eight new training institutions for men include five started by Government and three by private bodies. Of the five Government Training institutions two are ordinary Training institutions

started by the conversion of the Government Boys' High Schools at Ratnagiri and Surat, the remaining three being Basic Training Centres started in order to supply trained teachers for Basic schools. The three ordinary Training institutions started by private bodies include two institutions for Marathi teachers, viz., the Maharshi Shinde Training College, Nasik, opened by the Maratha Vidyaprasarak Samaj, the Gandhi Training College, Poona, started by the Poona City Municipality for the training of its own teachers, and one institution for Kannada teachers, viz., the Karnatak Education Board's Training College, Dharwar.

The number of Training institutions for women has increased by 2 to 17. One of the two new institutions is the Archbishop Roberts Training College, Bandra, started for the benefit of teachers working in the Primary schools where the medium of instruction is English. The other additional Training institution for women (viz. Z. B. M. M. Urdu Normal Class, Sholapur) is not, however, altogether a new institution, but one, which had been temporarily closed during the previous year but was reopened during the year under report.

Output of trained teachers.

8(2). It was pointed out in the last year's report that the Committee appointed by Government to consider and report on the question of the training of Primary Teachers had emphasised the need for training as many of the teachers already in service as possible. It was, therefore, decided by Government to train all teachers within a period of ten to fifteen years. As a result of this policy, the total number admitted for training increased from 1,900 to 3,500 and the total number of trained teachers turned out was 1,066 i.e. 466 in excess of the number trained in the previous year.

On the recommendations of a Special Committee appointed by Government the courses of studies were also revised both in the case of men and women teachers, the third year classes in the Primary Training institutions were abolished, and the former intermittent training replaced by a course of continuous training for 2 years.

For women teachers, however, the course continues to be one of three years for the present. In view of the fact that standard VII has been added to Primary Schools for girls and the standard of Primary School Leaving Certificate Examination for Boys and Girls is proposed to be brought to the same level, the question of having only a two year course of training for women teachers will have to be considered in the near future.

Expenditure.

8(3). The expenditure on Primary Training Institutions increased by Rs. 1,64,990 to Rs. 6,35,983. The substantial increase was the result of the additional expenditure incurred on the expansion of Government institutions, additional grants to old aided institutions and fresh grants to newly started private Training institutions. Of the total expenditure, 84·9

per cent. was defrayed from Provincial funds, 2·1 per cent. from Municipal funds, 4·3 per cent. from fees and 8·7 per cent. from other sources. The cost of educating a student in a Government Training institution for men was Rs. 202, of which Government contributed Rs. 201, while in the case of women the cost was Rs. 428, of which an amount of Rs. 423 was paid by Government. The cost per student in aided institutions for men was Rs. 95, of which an amount of Rs. 63 was paid by Government. The cost per student in aided institutions for women was Rs. 137, of which an amount of Rs. 54 was contributed by Government.

The classification by languages of the training institutions for men and women and of the students receiving training therein is shown below:—

—	Number of Institutions.							Number of students.						
	For Men.			For Women.				For Men.			For Women.			
	Government.	Non-Government.	Total.	Government.	Non-Government.	Total.	Grand Total.	Government.	Non-Government.	Total.	Government.	Non-Government.	Total.	Grand Total.
1. Marathi ..	5	5	10	1	7	8	18	811	507	1,318	112	485	597	1,915
2. Gujarati ..	3	1	4	1	3	4	8	434	23	457	86	255	341	798
3. Kannada ..	2	1	3	1	..	1	4	315	39	354	70	..	70	424
4. Urdu ..	3	..	3	1	2	3	6	217	..	217	65	35	100	317
5. English ..	..	..	..	..	1	1	1	..	..	..	..	59	59	59
Total ..	13	7	20	4	13	17	37	1,777	569	2,346	333	834	1,167	3,513

Of the 37 Training institutions for men and women, four are Basic Training Centres, two train Kindergarten teachers, and one is a vocational Training school. The remaining 30 are ordinary Training institutions.

The Vocational Training school is a non-Government Training institution for men at Ankleshwar which has a rural bias and teaches a special course including agriculture, carpentry, etc.

The two Kindergarten Training schools, viz. (1) the Mary B. Harding Kindergarten Training School, Sholapur, and (2) the Bal Adhyapan Mandir, Dadar, prepare teachers for pre-primary and Kindergarten schools.

Basic Training Centres were newly opened this year to meet the requirements of the experimental Basic Primary Schools started in certain compact areas in Gujarat, Maharashtra, and Karnatak. These Training Institutions follow a specially devised course of training for one year the main object being to train teachers to teach through a craft. The craft selected so far is Spinning and Weaving, but the question of introducing Agriculture as a Basic Craft is under consideration. These institutions are still in an experimental stage and their future will depend upon the success of Basic Primary Schools.

Selection of teachers for training.

8(4). The general policy adopted at present is to train all untrained teachers already in service and who are between 22 and 40 years of age in about 10 to 15 years' time. Teachers in service within the above age-limits are, therefore, selected for training provided they are certified to be medically fit and are otherwise eligible. In the past, candidates for training were selected by the School Board.* Under the amended Primary Education Rules the School Board Administrative Officers have been empowered to recommend to the Educational Inspectors candidates for training. The Educational Inspectors, therefore, select teachers for training from among those recommended by the Administrative Officers according to age groups. Teachers senior in age, pay and service are, as a rule, given preference. This change in the method of selection for training has made it difficult for the prescribed communal quota in the matter of admissions to Training Institutions to be strictly adhered to. In view, however, of the fact that all teachers are to be trained in due course, the change is not likely to result in any injustice or hardship to teachers of any particular community. Nevertheless instructions have been issued to ensure that an adequate number of Backward Class teachers are selected for training, even if they are not ordinarily eligible for admission according to seniority in age, pay, etc.

In the past aided Training Institutions used to admit either fresh candidates, or teachers working in private aided institutions. From the year 1939-40 Local Authority teachers have been permitted to be deputed to private Training Institutions, and the institutions concerned are given special fee grants for Local Authority teachers.

Grant of Stipends and Duty pay.

8(5). Up to last year, teachers admitted on behalf of District Local Board Local Authorities were given only stipends at the rate of Rs. 10 per mensem for men and Rs. 15 per mensem for women. With effect from June, 1939, Government, however, sanctioned the payment of stipends at the above rates to teachers deputed by Municipal Local Authorities also.

The decision to admit teachers to the Training Institutions by age groups involved some hardship as many of the teachers admitted for training were men of advanced age with large families to support. While under training, these teachers have to support themselves and in addition to maintain their families at home. As in the majority of cases additional training does not involve additional pay a number of senior teachers

express their reluctance to go up for further training. The Moos-Paranjpe Committee considered this aspect of the case and recommended the payment of full pay to teachers under training and Government advised the Local Authorities to grant full duty pay in lieu of stipends to permanent Local Authority teachers in service for the period of their training, with effect from June, 1939. Many of the Local Authorities have accordingly given duty pay to teachers deputed for training. The Local Authorities which have not sanctioned payment of duty pay on account of financial or other reasons are being again advised to sanction the grant of duty pay to their teachers under training.

General Remarks.

8(6). With the introduction of the system of giving two years' continuous training, the courses of studies for the Primary Training Institutions for Men and Women were modified as stated above. The revised courses were introduced with effect from the academic year commencing from June, 1939. The new courses of studies have worked satisfactorily. As the period of training extends over a period of two years and is continuous, the training has become much more effective and it has become possible to lay proper stress on practice in teaching and to give adequate intensive training in multiple class teaching to teachers undergoing training.

Hand-work and Hindustani with a knowledge of both the Nagari and the Urdu scripts continued to be taught in all the Training Institutions for men and women.

The special concession of being admitted direct to the Second year class granted to matriculates has attracted a good number of matriculates to Primary schools. These teachers are reported to have done well. They shewed better progress and better grasp of general principles of education than the ordinary Primary School Leaving Certificate teachers.

In connection with the scheme of Voluntary Primary schools certain private individuals and Associations organised Training Camps for the benefit of teachers employed in these schools. These camps were, however, mostly confined to the Southern Division and provided a Short-term course of training ranging from 15 days to about 3 months. The attendance varied from about 20 to about 100 at each Camp. The object of these courses was to give an idea to the teachers concerned of the elements of Physical Education and of the various subjects included in the syllabus, in addition to some training in Hygiene, Medical aid, Communal unity, etc. These camps were subsidised by Government.

CHAPTER IX.

Professional Schools and Classes.

9(1). Professional Schools and Classes are institutions which impart instruction in technical and allied subjects. The standards of instruction and of admission to these institutions vary according to the nature and duration of the courses. Some are under the control of other Departments. A statistical summary of these institutions is given below :—

1	Number of institutions. 2	Number of Pupils. 3	Expenditure. Provincial. 4	Expenditure. Total. 5	Average annual cost per pupil. Total cost. 6	Average annual cost per pupil. Cost to Government. 7
			Rs.	Rs.	Rs.	Rs.
Commercial Schools ..	33	2,078	2,665	1,19,721	59	1
Engineering and Technical and Industrial Schools ..	88	6,109	2,65,028	8,59,429	111	34
Agricultural Schools ..	4	131	14,572	29,185	216	108
Medical Schools ..	3	700	64,109	1,51,254	216	92
Art Schools ..	3	782	60,101	1,10,569	157	85
Language Schools ..	49	2,040	5,170	76,462	37	3
Music Schools ..	12	491	..	14,483	25	..
Other Special Schools ..	7	414	58,938	93,143	225	142
Gymnasia ..	147	10,669	42,064	1,46,549	11	3

The language schools mostly comprise Maktabs, and Sanskrit Pathashalas.

A—Commercial Institutions.

9(2). The number of institutions increased from 30 to 33, but the number of pupils decreased from 2,164 to 2,078. These institutions provide instruction in various Commercial subjects and cater for students appearing for the examinations held by the London Chamber of Commerce or for the Government Commercial Diploma and Certificate Examinations and also for those who desire to improve their prospects by additional training in Commercial subjects.

Detailed statistical information on account of the 33 Commercial schools and classes appears in the Supplement to this Report.

The London Chamber of Commerce holds three examinations: (*i*) Elementary, (*ii*) Certificate and (*iii*) Higher Certificate. The number of candidates for the Higher Certificate Examination of 1939 was 760, as against 746 in 1938, and the number of passes was 288, as against 309. As usual most of the candidates appeared for "Book-keeping and Accountancy". Of the 9 girls who appeared at the Higher Certificate Examination, 6 passed in one or more subjects. One of the candidates passed in all the four subjects in which she appeared and obtained distinction in one.

London Chamber of Commerce Examinations.

9(3). The Government Commercial Diploma and Certificate Examinations were held, as usual, at Bombay, Poona and Karachi. At the Diploma Examination held in 1940, 189 candidates appeared (as against 169 in 1939), and 64 passed. At the Certificate Examination 275 candidates appeared and 187 passed in individual subjects.

Government Commercial Diploma and Certificate Examinations.

To encourage greater proficiency in Shorthand, a Higher Certificate Examination in Shorthand has been instituted. This examination was held for the first time in April, 1940, when 24 candidates appeared and 20 passed the test.

In the Elphinstone High School, Bombay, there are both Day and Evening classes in Commercial subjects. The number of pupils admitted was 94—83 in the Evening class and 11 in the Day class. Of the 20 candidates sent up for the Government Commercial Diploma Examination, 11 passed, and of the 26 appearing at the Certificate Examination, 12 were successful.

In the J. D. Vakil Commercial School, Broach, the number of pupils declined from 42 to 38. Of the 2 candidates sent up for the Government Commercial Diploma Examination, 1 passed, and of the 27 candidates for the Certificate Examination, 18 passed.

B—Technical and Industrial Schools.

9(4). The only Engineering classes under the control of the Educational Department are the Diploma classes attached to the College of Engineering, Poona. The number of students of these Diploma classes increased from 263 to 266 and the results of the examinations held in March, 1940, were as under:—

Diploma Classes attached to the College of Engineering, Poona.

	Number appeared.	Number passed.
Diploma in Civil Engineering	30	23
Diploma in Mechanical Engineering and Electrical Engineering	36	31

The total expenditure on the Diploma Classes was Rs. 50,834, as against Rs. 49,307 in 1938-39.

9(5). The Technical and Industrial schools of the Province are under the control of the Department of Industries. Details of the progress of these institutions will be found in the Report of the Director of Industries. The tables attached to this Report contain some significant details about them.

The V. J. Technical Institute, Bombay, is the premier Technical Institute in this Province.

Victoria Jubilee Technical Institute, Bombay.

Candidates from different parts of India apply for admission and there has been an increasing demand for admission to the Electrical Engineering course in recent years. At the Entrance examination for admission in June, 1939, there were 322 candidates; of these 174 were granted admission of whom 120 belonged to Bombay Province.

The results of the Final Sessional examinations were as under :—

	Number appeared.	Number passed.
Mechanical Engineering	40	40
Electrical Engineering	43	42
Textile Manufacture	22	22
Technical and Applied Chemistry ..	11	11
Sanitary Engineering and Plumbing ..	7	7

Committee of Direction for Technical and Industrial Training.

9(6). The general control of the Technical and Industrial education is in the hands of the Committee of Direction for Technical and Industrial Training of which the Director of Industries is the Chairman. In order to maintain contact between the Educational Department and the Committee, the Director of Public Instruction or his nominee is a member of the Committee.

During the year under report the Committee had under its control 78 schools in the Province of Bombay. There are 25 different courses of instruction followed by the various institutions under the control of the Committee.

Of the 2,338 pupils who appeared for the annual examinations, 1,886 were successful. In the final examinations 984 candidates appeared and 730 candidates satisfied the examiners.

The total expenditure of the Committee was Rs. 16,080, of which Rs. 3,005 was incurred on establishment, Rs. 3,703 on inspection and Rs. 9,371 on examinations. An amount of Rs. 40,676 was paid as recurring grants-in-aid to schools under its control. The non-recurring grants amounted to Rs. 2,985 and a recurrent *pro forma* grant-in-aid of Rs. 3,339 was also made to the Narsingrao Shivaji Dharamji Industrial School for the Blind conducted by the Blind Relief Association.

9(7). The Government Technical institutions under the Department of Industries are the R. C. Technical Institute, Ahmedabad, the Government Leather Working School and the Tanning Institute, Khar, and the Central Handweaving Institute, Poona.

In addition to the above institutions, the Department of Industries maintained during the year 5 peripatetic cotton-weaving schools for *bona fide* weavers, 2 weaving schools for Agriculturists, one wool-weaving school for training dhangars and wool-weavers, 7 peripatetic cotton weaving demonstrations, 3 wool-weaving demonstrations, 3 dyeing demonstrations, and 6 tanning demonstrations.

The Department also extended its activities to the following cottage industries :—

(1) Cane and Bamboo Work.

(2) Lacquer Work.

(3) Coir Manufacture.

(4) Art Crafts.

(5) Match Making.

Apprentice Scheme.

9(8). The scheme of apprenticeship, to which a reference was made in the previous Report, was continued during the year with a view to mitigating the evil of unemployment. Of the 244 candidates who appeared for the entrance examination held in Bombay and 57 at Ahmedabad, 102 and 31 respectively were admitted and placed in Mills and other industrial concerns as apprentices. Of the 102 candidates in Bombay, 54 were apprenticed to Mills and 48 to workshops, while all the 31 candidates at Ahmedabad were absorbed by the various local mills.

Other Industrial Institutions.

9(9). Apart from the Technical and Industrial schools, which are under the control of the Department of Industries, there are 35 schools or classes recognised by this Department. Most of these institutions are for girls or women and provide instruction in sewing, tailoring, embroidery, knitting, first-aid, fancy work, etc. Grants amounting to Rs. 10,260 were paid to them in 1939-40, as against Rs. 10,520 in 1938-39.

Scholarships for Technical studies.

9(10). A number of scholarships are awarded annually by the Department of Industries in the different technical institutions under its control. In addition to these, 2 scholarships are ordinarily available for research in Technical Chemistry and one for practical training in Electrical Engineering.

One of the two scholarships awarded in 1938-39 for research work tenable at the Royal Institute of Science, Bombay, was extended for one year more. Two new scholarships in Technical Chemistry were awarded during the year—both tenable at the Royal Institute of Science, Bombay.

The scholarship for practical training in Electrical Engineering awarded in 1938-39 terminated as it was sanctioned for one year only. One new scholarship was awarded during the year under report at the workshop of the Great Indian Peninsula Railway, Bombay.

The three State Technical scholarships of £ 216 each per annum awarded in 1938-39 were continued during the year under report.

The scholarship awarded to a Scheduled class student for the Tanning course in England was also continued for the major portion of the year.

C—Agricultural Schools.

9(11). There are two Primary Agricultural schools maintained by the Agricultural Department—one at Dhulia in the West Khandesh District and the other at Devihosur in the Dharwar District. These schools impart instruction in Agriculture on modern and practical lines.

In addition to the above two schools, there are two other Agricultural schools under private management—one at Rajapur managed by the Shikshan Prasarak Mandali, Rajapur, and the other at Puntamba in the Ahmednagar District. They were paid by this Department a grant of Rs. 2,900 and Rs. 250 respectively during the year under report.

D—Medical Schools.

9(12). In addition to the Grant Medical College, Bombay, an account of which is given in Chapter V, the Medical Department maintains two Medical schools at Poona and Ahmedabad, with an attendance of 236 and 226 students respectively. Of these, the number of women students was 42 and 15 respectively. These schools prepare students for the L.C.P.S. Examination. In addition to these schools there is the National Medical College, Bombay, which is recognised for sending candidates for the L.C.P.S. Examination.

E—Veterinary College.

9(13). The Veterinary College, Bombay, which is the only institution of its kind in this Province, teaches a course of three years leading to the G.B.V.C. For practical training the Bai Sakarbai Dinshaw Petit Hospital is used. There were 138 students in the College, of whom 43 were in the first year, 44 in the second year and 51 in the third year. Thirty-eight students passed the final examination and secured the Diploma during the year.

The total expenditure of the College amounted to Rs. 61,671, of which Rs. 45,692 was met from Provincial Funds, Rs. 15,578 from fees and Rs. 401 from other sources.

F—Art Schools.

9(14). The Sir J. J. School of Art is under the control of the Diretcor of the Sir J. J. School of Art and details of its progress appear in his report.

The number of students on the rolls of the School on the 31st March, 1940, was 615, as against 527 of the preceding year. The number of students in the various classes was as under :—

Name of class.	1938-39.	1939-40.
Drawing and Painting Classes	229	219
Elementary and Intermediate Drawing Grade Classes ..	18	55
Modelling Classes	21	22
Normal Classes for Drawing Teachers	40	40
Architectural Classes	126	131
Commercial Arts Section	93	148
Total ..	527	615

Many students of the different sections of the School exhibited their work in the various exhibitions held in India and received well-merited recognition in the form of money prizes and medals. A number of the students did particularly well in the Art Exhibition held in Calcutta. The Mural Decoration Class produced some very successful work during the year.

The number of students in the School of Sculpture was 22, as against 21 during 1938–39, and there were 142 students in the Architectural section of the School.

Reay Art Workshops.

9(15). The number of students in the Reay Art Workshops was 114 as against 109. The craft section of the School continues to do pioneer work in maintaining the consummate skill of the Indian hereditary craftswork. During the year under report 24 orders were received to be executed by this section.

Drawing and Design Classes.

9(16). Under the control of this Department were the Drawing and Design classes in Ahmedabad and Surat.

There were 30 pupils on the roll of the Drawing and Design Class attached to the R. C. High School, Ahmedabad. They received training in the different branches as shown below :—

Class.	Carpentry and Metal Work.	House Decoration.	Others.	Total.
Elementary	8	5	4	17
Advanced	7	3	3	13
Total ..	15	8	7	30

The Drawing and Design Class, Surat, under the management of the Sarvajanik Education Society, Surat, had on its roll 27 pupils as against 20 pupils in 1938–39.

G—Music Schools.

9(17). Music forms part of the curriculum of Primary schools (both for boys and girls) and is taught as an optional subject in some Secondary schools. It is also included in the Primary School Leaving Certificate Examination for Girls and for the Primary Training College Certificate Examination.

There were also 12 private classes for instruction in Music, both vocal and instrumental, with 567 pupils attending them. As a measure of retrenchment, Government have discontinued paying grants to these classes since the year 1933–34.

H—Gymnasia.

9(18). The number of gymnasia recognised during the year increased from 124 to 147. The number on the rolls in these gymnasia was 15,395 as against 12,811 during the year 1938–39. Out of the 15,395 pupils, 4,726 attended other institutions as well. A total grant of Rs. 9,780 was paid to the gymnasia during the year.

Training Institute for Physical Education, Kandivli, Bombay.

9(19). The Training Institute for Physical Education, Kandivli, is a Government institute under the direct control of this Department. It is a residential Institute with separate arrangements for women students, and is primarily intended for the training of teachers in Physical Education. Tuition at the Institute is free, and about 10 per cent. of the students under training receive stipends of Rs. 25 per mensem. The teaching is both practical and theoretical.

The number of students in the Institute was 75 (including 9 women), of whom two were from outside the Province.

The Institute organised a ten days' scout training camp at Marwara and a three days' Safety First Course for the students.

Two Short Term courses for Secondary school teachers and one for the Heads of Secondary schools and Training institutions were arranged by the Institute during the year under report. The number of teachers completing these courses was—

Course.	Men.	Women.	Total.
1st Short Term course	83	10	93
2nd Short Term course	122	23	145
Short Term course for Heads of Secondary schools and Training institutions ..	20	6	26
Total ..	225	39	264

The total direct expenditure on the Institute was Rs. 35,814, of which Rs. 32,284 came from Provincial revenues. The total cost per student during the year was Rs. 431, while the cost to Government was Rs. 389.

The Board of Physical Education constituted during the preceding year held 7 meetings during the year under report and gave advice to all Government and non-Government institutions on matters connected with physical education.

CHAPTER X.

Oriental Studies.

Study of classics.

10(1). The study of a Classical language begins in Standard IV of a Secondary school and continues throughout the school course. Canditates at the Matriculation examination have the option of choosing an oriental classical language, and although a large majority of the pupils taking a classical language prefer Sanskrit or Persian, provision for instruction in other Oriental languages exists in some schools. Of the candidates who passed the Matriculation examination of 1940 with an oriental language, 7,743 passed with Sanskrit, 1,908 with Persian, and 74 with Arabic, while 649 passed with other oriental languages.

For the higher examination in Arts, Sanskrit and Persian also retain their popularity. The results of the examinations of 1940 shew that of the 123 candidates who took the B.A. degree 86 took Sanskrit, 14 Persian, 12 Ardha-magadhi while the remaining 11 took other Oriental languages. The corresponding figures for the M.A. were 29, 20, 6, 1 and 2 respectively.

Apart from the instruction in Oriental languages imparted in ordinary schools and colleges, there are special institutions known as Pathashalas for the study of sanskrit and Madressahs for the study of Persian or Arabic. There were 54 Pathashalas and 36 Madressahs during the year attended by 2,007 and 2,580 pupils. Grant-in-aid amounting to Rs. 3,175 were paid to Pathashalas and Rs. 1,671 to Madressahs during the year.

With the exception of a few institutions which maintain a comparatively higher standard of instruction, Pathashalas generally follow an elementary course in Sanskrit in addition to Vedic studies. English is also taught in some Pathashalas, and pupils from higher standards of Secondary schools attend the Sanskrit classes of some institutions.

A few Pathashalas send up candidates for the examinations of the Calcutta Sanskrit Association, while a few other prepare for the Elementary and Intermediate examinations of the Government Sanskrit College, Benares. Among these, the Gokuldas Tejpal Sanskrit Pathashala, Bombay, the Warad Sanskrit Pathashala, Sholapur and the Gangadhar Sanskrit College, Hubli, deserve special mention.

The Poona Sanskrit College aims at an advanced study of Sanskrit and is doing useful work for the preservation of the old traditional Shastric learning. It has an enrolment of 20 students, including 11 in the preparatory classes.

Oriental Institutes.

10(2). Among the Institutions which aim exclusively at the advancement of Oriental learning and scholarship, the Bhandarkar Oriental Research Institute, Poona, the K. R. Cama Oriental Institute, Bombay, and the Bombay Branch

of the Royal Asiatic Society, may be specially mentioned. These Institutes maintain valuable libraries of rare manuscripts, books, etc., which are lent to scholars from India and abroad. Scholarships and prizes are awarded for original research. These Institutes frequently invite eminent scholars to deliver lectures on oriental subjects.

Apart from these special institutes, there are others which are doing useful work in their own fields. The Indian Historical Research Institute at St. Xavier's College, Bombay, the Karnatak Historical Research Society, the Bharat Itihas Samshodhak Mandal, Poona, aim at Original research in Historical subjects, and the Mimansa Vidyalaya, Poona, is interested in a critical study of the Mimansa Shastra.

During the year a Kannad Research office was established at the Karnatak College, Dharwar, for work in connection with research in Kannada literature. It aims at collecting and publishing basic material for the study and interpretation of the ancient culture of Karnatak. The Gujarat Research Society is doing useful work along similar lines at Ahmedabad.

CHAPTER XI.

Visual Instruction.

11(1). The Department of Visual Instruction is in the charge of a special Deputy Educational Inspector in the B.E.S. Class II. Previous reports contain full details of the work of this sub-Department.

Magic lanterns.

11(2). The Department has 87 Magic lanterns in its charge. Of these 87 lanterns, 26 were in Government Secondary schools, 16 in Government Training Institutions, and 42 in the charge of Government Inspecting Officers, while 3 were in the charge of the Deputy Educational Inspector for Visual Instruction.

Seven District School Boards, 14 Municipal School Boards and 92 non-Government institutions had lanterns of their own. The total number of lanterns in use during the year was thus 200.

Slides.

11(3). The Department now has 36,512 slides comprising 570 sets. Seven sets of 678 slides were added during the year. These new sets deal with current topics such as Basic Education, Air Raid Precautions, Temperance, etc.

The Cinema has now proved popular as an effective visual aid and 15 non-Government schools, the Bombay Schools Committee and the District School Board, Sholapur, have Cinema projectors. The Deputy Educational Inspector for Visual Instruction also has an excellent Cinema outfit equipped with an electric lighting set and it is proving useful. The Department bought ten educational films, mostly travel pictures, during the year. These films are lent to institutions which have Cinema projectors.

Work done during the year.

11(4). Government Educational institutions made good use of the lantern. The Deputy Educational Inspector for Visual Instruction reports that although some officers did excellent work, the Government Inspecting Officers only just maintained the minimum limit prescribed for lantern lecturing work. He, however, attributes this partly to the time required for taking possession of the lanterns lent to the School Boards and partly to the time spent on repairing the lanterns many of which came back from the Boards in an unserviceable condition.

Twelve out of the 19 Municipal School Boards, including the Bombay Municipal Schools Committee, had lanterns of their own, but with the exception of only 4, the work done by these bodies was poor.

The Deputy Educational Inspector for Visual Instruction reports increasing interest in the non-Government schools in Visual Instruction work, a few of these schools having acquitted themselves as creditably as some of the best Government schools.

Work done by the Deputy Educational Inspector for Visual Instruction.

11(5). The Deputy Educational Inspector for Visual Instruction conducted as usual a Training Course in Visual Instruction for Secondary Teachers deputed to the Secondary Training College, Bombay. He also delivered magic lantern lectures in educational institutions and in public places in Bombay and the suburbs and prepared new slides and lecture-notes on certain sets of slides. During the course of his tour he inspected 36 Government lanterns, observed the lectures delivered by various officers and institutions and held 10 Conferences of Primary Teachers. He also delivered more than 200 lantern lectures on a variety of subjects. His services were in constant demand not only in Educational Institutions but also at public functions and festivals, educational conferences and exhibitions. Of the 96 public lectures delivered by him during the year, 77 were on adult education and 19 on Village Uplift.

CHAPTER XII.

Education of Girls.

Institutions and Pupils.

12(1). The remarkable increase in the enrolment of girls was not only maintained during the year, but there was a further increase in the number of girls receiving education.

The total number of institutions for girls increased by 235 to 2,064 and the number of pupils in them by 27,830 to 253,485. The number of girls under instruction in all kinds of institutions increased by 66,672, or by 17·3 per cent., to 453,060, as against an increase of 38,539, or 11·1 per cent., during the previous year. The following table gives further details :—

——	No. of institutions for girls.	No. of pupils in institutions for girls.	No. of boys in institutions for girls.	No. of girls in institutions for girls (Column 3–4).	No. of girls in institutions for boys.	Total number of girls under instruction (Columns 5+6).
1	2	3	4	5	6	7
Bombay Division.	609	81,255	3,248	78,007	67,275	145,282
Central Division.	553	65,082	1,411	63,671	67,289	130,960
Northern Division	497	64,749	1,708	63,041	39,896	102,937
Southern Division	368	32,836	302	32,534	31,527	64,061
European Schools.	16	2,904	407	2,497	634	3,131
Secondary (English) Schools.	21	6,659	1,287	5,372	1,317	6,689
Total ..	2,064	253,485	8,363	245,122	207,938	453,060

The number of girls attending the different kinds of educational institutions appears in appendix I of this Report. The

following table shews the extent to which girls from the various communities took advantage of the educational facilities provided for them :—

	Total number under instruction.	Percentage to total.	Percentage to female population of the community.
1	2	3	4
European and Anglo-Indians	2,810	0·6	22·2
Indian Christians	18,899	4·2	15·5
Hindus — Advanced	131,834	29·1	21·6
Hindus — Intermediate	169,324	37·4	3·3
Hindus — Backward	39,336	8·7	2·1
Muslims	65,569	14·5	9·0
Parsis	8,389	1·8	20·3
Others	16,899	3·7	10·5
Total ..	453,060	100·0	5·3

Although the percentage of girls belonging to the Intermediate and Backward classes is still low, it is noteworthy that they are attending schools in larger numbers. The increase in the percentage of Muslim girls under instruction to the total female population of the community from 7·9 to 9·0 during the year is a pleasing feature indicating the increasing desire of the Muslim community for the education of their girls.

Expenditure.

12(2). It is not possible to frame a correct estimate of the total amount spent on the education of girls, as 45·9 per cent. of the girls under instruction attend institutions for boys. The expenditure on institutions specially intended for girls during the year increased by Rs. 3,43,320 to Rs. 70,42,596 and was met from the following sources :—

	Amount.	Percentage.
	Rs.	
Government Funds	27,52,528	39·1
District Local Board and Municipal Funds.	16,54,926	23·5
Fees	14,88,502	21·1
Other sources	11,46,640	16·3
Total ..	70,42,596	100·0

University Education.

12(3). There are no separate colleges for women affiliated to the Bombay University but women from all parts of the Province take advantage of the various Arts and Professional Colleges at various places. The following table compares the number of women attending the Arts and Professional Colleges affiliated to the Bombay University :—

	1939–40.	1938–39.
Arts Colleges	1,981	1,510
Professional Colleges—		
Secondary Training Colleges ..	60	26
College of Commerce	12	12
Law Colleges	16	15
Medical Colleges	169	189
College of Engineering	1	..
College of Agriculture	1	2

The increase in the number of women in the Secondary Training Colleges is due to the increase in the number of places reserved for women to remove, as far as possible, the disparity between the number of trained men and women teachers. Of the 60 women under training, 10 were attending the Secondary Training College, Belgaum. The number of women who passed the various important examinations will be found in Government of India table VIII published with this Report.

S. N. D. T. Indian Women's University.

12(4). The Indian Women's University, which is not a statutory body, had on the rolls of its four affiliated colleges at Poona, Bombay, Ahmedabad and Baroda 252 women, as against 199 in the preceding year. The main characteristics of this University have been described in previous reports.

The degrees conferred by the University have been recognised by Government for the purpose of appointments to Government and semi-Government service. The University was given a recurring grant of Rs. 5,000 during the year.

The 21 Secondary schools affiliated to the University were attended by 5,378 pupils. Five of these schools, with 1,214 pupils, were either in the Indian States or in other Provinces.

Secondary Education.

12(5). The number of recognised Secondary schools for girls increased by 11 to 123 and the number of pupils in them by 2,859 to 26,955, of whom 25,148 were girls. In addition to these girls, there were 11,111 in boys' schools, giving a total of 36,259 girls under instruction in

Secondary schools as against 31,478 in the preceding year. The following table compares the figures for the last two years :—

	Secondary Schools for girls.		Girls under instruction in Secondary schools.	
	1939-40.	1938-39.	1939-40.	1938-39.
Indian	110	96	33,286 (10,477 in Boys' schools).	28,554 (8,650 in Boys' schools).
Anglo-Indian and Europeans.	13	16	2,973 (634 in Boys' schools).	2,924 (518 in Boys' schools).
Total ..	123	112	36,259 (11,111 in Boys' schools).	31,478 (9,168 in Boys' schools).

Of the 123 Secondary schools for girls, 7 are maintained by Government and 6 (English classes) by Local Authorities, while 110 are maintained by private bodies or individuals. In addition to the Anglo-Urdu High School for girls at Poona, Government maintain full High Schools for girls at Ahmedabad and Nasik, and Middle Schools for girls at Thana, Ahmednagar, Dharwar and Bijapur. During the year these Middle Schools opened higher standards with a view to developing gradually into full High Schools.

Nearly one-third of the girls under instruction in Secondary schools attend boys' schools. It is reported that despite the fact that girls are unable to take any real part in the corporate life of a boys' school, they attend them partly because of the absence of adequate provision for higher Secondary education in smaller towns and partly through the desire of parents who have greater confidence in the efficiency of boys' schools. The Inspectress of Girls' Schools, Central Division, remarks that there is some justification for this tendency as girls' schools are of more recent growth and their development has suffered from financial difficulties and from a dearth of qualified women teachers, especially in the mofussil areas.

The following table compares the number of girls belonging to the various communities under instruction in Secondary schools :—

Community.	Number of Girls under instruction.	
	1938-39.	1939-40.
1	2	3
Anglo-Indian and Europeans	2,726	2,628
Indian Christians	4,804	5,247
Hindus { Advanced	15,219	18,194
Hindus { Intermediate	2,359	2,878
Hindus { Backward	106	147
Muslims	997	1,259
Parsis	3,836	4,107
Others	1,431	1,799
Total ..	31,478	36,259

It will be seen that the increase of 4,781 girls under instruction during the year was shared by all communities except the Anglo-Indians and Europeans who recorded a drop of 98 during the year. This decrease appears to be due to conditions arising from the War.

Teachers.

12(6). No separate provision for the training of women teachers for Secondary schools exists in this Province. Women teachers desiring the requisite professional qualification attend the Secondary Training Colleges affiliated to the Bombay University. The total number of women teachers in all Secondary schools increased by 97 to 1,703, of whom 920 were in ordinary Secondary schools, 525 in Secondary (English) schools and 258 in European schools. Of the 920 women teachers in ordinary Secondary schools, 236, or 25·7 per cent., were trained, and 406, or 44·1 per cent., were graduates.

Most of the women graduates from year to year gravitate to schools in big cities with the result that girls' schools in the mofussil find it difficult to secure well qualified or trained women and have consequently to supplement their staff of men teachers by the appointment of matriculated and untrained women. The majority of the Secondary schools have now introduced scales of pay for their teachers.

and the institution of a Government Provident Fund Scheme, which is to be introduced for teachers in non-Government Secondary schools, is likely to generate a sense of security and to improve prospects for the future. These measures will, no doubt, go a long way to stabilize the staff of Secondary schools and will eventually reflect on the efficiency of these schools.

Curriculum.

12(7). With the exception of a few schools which follow a special curriculum, the majority of the Secondary schools follow the course prescribed in Schedule D of the Grant-in-aid Code. Recognised High Schools prepare for the Matriculation examination of the Bombay University, while some of them also send up candidates for the entrance examination of the Indian Women's University. There has been no change in the curriculum for Secondary schools during the year except the introduction of Hindustani in the first three standards.

Primary Education.

12(8). The number of Primary schools for girls increased by 54 to 1,618 and the number of pupils in them by 21,012 to 213,844. The following table compares the number of Primary schools for girls under different managements and the number of pupils in them :—

	Schools.		Pupils.	
	1938-39.	1939-40.	1938-39.	1939-40.
Government	10	12	1,233	1,403
District Local Board	750	758	55,744	62,266
Municipal	536	547	109,634	121,444
Aided	243	289	24,467	27,438
Unaided	25	12	1,754	1,293
Total ..	1,564	1,618	192,832	213,844

Aided schools show the largest increase in the number of schools. This is due partly to the opening of new approved schools and partly to certain unaided schools having been taken on the list of aided

schools. The largest increase in the number of pupils was in Municipal schools. The following table compares the percentage of increase in enrolment in each Division :—

Division.	Number of pupils.		Percentage increase.
	1938-39.	1939-40.	
Bombay Division	56,495	65,183	15·4
Central Division	53,819	58,856	9·4
Northern Division	54,231	58,169	7·3
Southern Division	28,287	31,636	11·8
Total ..	192,832	213,844	10·9

Of the 213,844 pupils under instruction in girls' schools, 5,598 were boys and 208,246 girls. In addition to the 208,246 girls in Primary schools for girls, there were 186,722 girls in Primary schools for boys, giving a total of 394,968 girls under instruction in Primary schools, as against 336,718 in the preceding year. The increase of 58,250 girls under instruction in Primary schools during the year is noteworthy, particularly as it is shared by all the main communities. Details of the girls belonging to the various communities under instruction in Primary schools will be found in Appendix I of this Report.

Of the 394,968 girls under instruction in Primary schools, 372,384, or 94·3 per cent., were in the Lower Primary stage, and only 22,584, or 5·7 per cent., in the Upper Primary stage of instruction. There was an increase of about four thousand girls in the Upper Primary stage which is mainly due to the addition of standard VII. The number of girls under instruction in each standard of Primary schools have been given side by side with similar figures for boys in Chapter VII.

Curriculum.

12(9). The opening of standard VII in girls' schools and the introduction of the new course for that standard has resulted in certain consequential changes in the curriculum for standards VI and V. The old curriculum was followed in the Lower Primary standards, except in a few selected schools in which the revised curriculum, which has since been finally approved by Government, was introduced as an experimental measure.

The women teachers in charge of 1st grade schools for girls experienced some difficulty with certain subjects of the curriculum for standard VII which demand a good deal of general knowledge. Special Refesher courses were held by the Local Authorities for the

benefit of such teachers wherever possible and in other cases the Head Master from the local boys' school was asked to help these women teachers to cope efficiently with the new curriculum.

The introduction of practical domestic Science in the new curriculum is a welcome addition but the Inspecting Officers report that unless the requisite facilities for practical work are provided the object of the introduction of practical work in domestic Science will not be achieved.

Primary School Leaving Certificate Exmination for Girls.

12(10). The total number of girls appearing for the Primary School Leaving Certificate Examination for girls from the British Districts decreased during the year by 2,716 to 4,156, of whom 185 had appeared for the Urdu Primary School Leaving Certificate, as against 318 in the preceding year. The fall is reported to be due to the fact that owing to the opening of standard VII in girls' schools during the previous year, girls who were promoted to that standard were not able to prepare themselves for the examination. A separate examination for candidates who had failed during the previous year was also held under the old course.

Of the 4,156 girls who appeared for the examination in the various regional languages, 1,710, or 41·1 per cent., passed. Full details of the result of this examination have been given side by side with the results for the Primary School Leaving Certificate examination for boys in Chapter VII.

Teachers.

12(11). The total number of women teachers in all kinds of Primary schools for boys and girls increased during the year by 716 to 6,792, of whom 3,398, or 50·0 per cent., were trained, as against 3,172, or 52·2 per cent., in the preceding year. The total number of women teachers in Government, District Local Board, and Municipal Primary schools increased by 547 to 4,886, of whom 2,610, or 53·4 per cent., were trained, as against 2,404, or 55·4 per cent., during the preceding year. Although the number of trained women teachers actually increased by 206, their percentage to the total number shewed a decrease of 2 which was due to a corresponding increase in the number of qualified (untrained) teachers which were employed by the Local Authorities to cope with the increase in the number of pupils.

Further statistical details of women teachers in Primary schools will be found in Government of India table VI-B and in appendix VIII published with this Report.

Physical Education.

12(12). With the introduction of physical education as a compulsory subject, greater attention is now being paid by girls' Secondary schools to the physical welfare of their pupils. Almost all girls' schools provide for some sort of drill, but want of a play-ground or at least an adequate open space in or around the school is a great handicap, and, except in a few cases, girls have to go without out-door games or sports. Women teachers trained at the Physical Training Institute,

Kandivli, who have since returned to their schools, are reported to be doing useful work towards an improvement in this important school activity.

The condition of Primary schools continues to be much the same as in previous years and the reason lies very largely in the generally unsatisfactory housing of girls' schools where there is little or no space for physical exercises. Moreover, women teachers show little aptitude or capacity for organizing games. There has, however, been among parents and pupils, in recent years, a gradual awakening to the necessity for physical education and greater attention is also being paid by Local Authorities to this important factor of education. Special grants are paid by Government to these bodies towards the expenditure incurred by them on physical apparatus and the Educational Inspectors' reports shew that a gradual progress in the attainments of girls in physical education is noticeable.

The Girl Guide Movement.

12(13). The Provincial Girl Guide Association had, in addition to 594 Commissioners and guiders, a total strength of 6,353, comprising 3,608 blue-birds, 2,431 guides and 314 Rangers. The Girl Guide section of the Hindustan Scout Association had a total of 5,970 of all ranks on 31st March, 1940.

Ten training weeks and six long tours in the rural areas, in addition to a good deal of local training work, were undertaken by the Provincial Girl Guide Association. Camping among guides and rangers continues to be popular and several camps were held during the year. It is reported that with the outbreak of the War a very large number of Commissioners, guiders and rangers joined the Women's Auxiliary Corps and many are engaged in Air Raid Precaution and Red Cross work and in allied activities.

School Buildings.

12(14). The housing problem both for Secondary and Primary schools for girls still continues to be difficult. Some of the schools in Bombay and elsewhere have been fortunate in having excellent buildings of their own, although some of them fail to meet the specific requirements of a school and are deficient in certain essential needs, such as the provision of satisfactory sanitary arrangements or of an open space for physical exercises. A large majority of the schools, however, meet in rented or rent-free buildings designed for residential or other purposes and they do not, therefore, meet the requirements of a school.

Of the 961 District Local Board Primary schools for girls, 694 are at present held in rented or rent-free buildings, while of the 344 Municipal schools for girls, 283 are housed in rented or rent-free buildings. With the limited funds at their disposal the Local Authorities are unable to cope with the increasing demand for school buildings. Except in the case of certain Districts which are fortunate in having building schemes

financed by public-spirited bodies or individuals, the housing problem of a very large number of Primary schools remains as difficult as ever. The District Building Committees, which have recently been formed, are dealing with the question and it is hoped that the funds placed at their disposal would help gradually to solve the problem to some extent.

Special Institutions.

12(15). Apart from the Training Institutions for women teachers, an account of which is given in Chapter VIII, there are other special institutions which cater mainly for grown up girls and women. These institutions impart instruction in various useful Crafts, such as knitting, embroidary, zig, bead and other fancy work. The number of these institutions at the end of the year was 45, in addition to 189 schools or classes for grown-up girls or women who could not attend ordinary Primary schools.

General.

12(16). The number of women teachers, both in Secondary and Primary schools, has increased and the reports of the Inspecting Officers record an improvement not only in numbers but in the general tone and progress of girls' education in its various branches. The Inspectress of Girls' Schools, Central Division, remarks—

> "The tendency to subordinate everything to the exactions of the "Matriculation examination while still very strong, shows perceptible "signs of weakening, Needle-work, Drawing, Painting, Music, and in an "increasing number of schools, a little practical Domestic Science are "now taking up space on the school time table which before was "devoted exclusively to purely academic subjects. I think that it is "safe to say that this departure from the old regime has not been found "to have any adverse effect on the work in other subjects. On the "contrary, both those who eventually matriculate and those who do "not, are benefitted by the wider field of knowledge and skill which "has been opened to them."

The progress of girls' education depends on a careful and sympathetic understanding of the problems peculiar to girls belonging to the various communities and the lines on which their education is planned. The appointment of Assistant Deputy Educational Inspectresses in the various Districts of the Province has facilitated a free discussion of these problems with the parents and the teachers and has created a feeling of confidence among women teachers.

CHAPTER XIII.

ANGLO-INDIAN AND EUROPEAN EDUCATION.

Introduction.

13(1). These schools cater mainly for the Anglo-Indian and European Communities but they admit non-Europeans up to a limit of 40 per cent.

Number of institutions and scholars.

13(2). There are in all 32 institutions for Anglo-Indians and Europeans (29 schools, 2 Training institutions and one Special school). All these institutions received a grant-in-aid except the Railway school at Dhond which has only been recently recognised. The number of scholars in these 32 institutions increased by 229 to 5,747 of whom 4,074 were Anglo-Indians and Europeans, while the remaining 1,673 belonged to various non-European communities. In addition to these, there were 1,241 Europeans and Anglo-Indians in other institutions, raising the total number under instruction to 5,315, which formed 16·5 per cent. of the total Anglo-Indian and European population of this Province.

Government of India Table VII published with this Report gives a statistical summary of Anglo-Indian and European Education, while the details of separate schools appear in the Supplement to the Report.

Expenditure on Anglo-Indian and European Education.

13(3). The total expenditure on institutions for Anglo-Indians and Europeans increased by Rs. 1,00,201 to Rs. 14,75,481 of which Rs. 4,78,255, or 32·4 per cent., was met from Government funds, Rs. 7,53,515, or 51·1 per cent., from fees, and Rs. 2,43,711, or 16·5 per cent., from other sources.

Higher Education.

13(4). Of the 30 Anglo-Indian and European students receiving higher education during the year, 21 were reading in Arts Colleges and 9 in Professional Colleges affiliated to the Bombay University.

Secondary Education.

13(5). The number of Secondary schools for Europeans was 29, the same as last year, of which 16 were for boys and 13 for girls. These schools were attended by 5,589 pupils, an increase of 219 during the year.

The expenditure on these schools increased by Rs. 31,063 to Rs. 9,51,621 of which 34·8 per cent. was met from Government funds, 49·6 per cent. from fees and 15·6 per cent. from other sources. The increase was due to normal growth in the salary of the staff and to additional equipment.

Teachers.

13(6). The total number of teachers in European Secondary schools decreased by 11 to 338, the decrease being due to a readjustment of the staff as a measure of economy. Of the 338 teachers, 259 were trained and 79 were untrained. During the

year a passage grant of Rs. 347 was paid to the Cathedral High School and St. Margaret's Training College, Bombay, for teachers recruited in England. Provision for the training of teachers in European schools exists at St. Mary's Training College, Poona, and St. Margaret's Training College, Bombay. Both these institutions prepare candidates for the Bombay European schools Teachers' Diploma examination and the Departmental Kindergarten Examination. St. Margaret's Training College also prepares candidates for the S. T. C. Examination. The total number of students under training in these institutions was, as last year, 100. Of the 20 stipends of Rs. 40 each awarded annually at these institutions, 15 are available at St. Mary's and 5 at St. Margaret's Training College.

A stipend of Rs. 60 p.m. was awarded to a teacher from the Cathedral and John Connon Boys' High School under training at the Chelmsford Training College, Ghoragalli.

Examinations.

13(7). The Cambridge Local examinations were held, as usual, in December, at the Bombay, Poona, Panchgani, Deolali, and Karachi centres. The following table gives the results of these examinations :—

Examination.	Number appeared.	Number passed.	Percentage of passes.	
			1939.	1938.
Cambridge School Certificate ..	229	195	85·1	70·1
Junior	266	181	68·0	73·6
Preliminary	8	7	87·6	68·6

The Cambridge Higher School Certificate Examination was held in July, 1939, at Bombay, Poona, and Karachi. Of the 22 candidates who appeared for the examination, 10 were successful. The Departmental Kindergarten examination was also held at five centres in and outside the Province. Twenty-four candidates appeared for the examination, of whom 14 passed. No candidate appeared at the Bombay Centre, while of the seven candidates who appeared at the Poona Centre, five passed.

The Bombay European Schools Teachers' Diploma examination was held at the two Training Institutions for Europeans in this Province and at the newly opened centre at Karachi. Thirteen candidates appeared for this examination, and 8 passed.

The Secondary Teachers' Certificate Examination is intended mainly for non-graduate teachers from Secondary schools. Graduate teachers

who are unable to join a Secondary Training College also appear for the Examination. St. Mary's Training College presented 17 candidates for the examination of whom 16 passed.

Scholarships.

13(8). An account of the scheme regulating the award of scholarships in European schools has been given in previous Reports. Four fresh senior scholarships and nine junior scholarships were awarded during the year on the results of the Cambridge Local Examinations. All the Junior and Senior scholarships available for the year were awarded. The total expenditure on scholarships during the year amounted to Rs. 7,050, as against Rs. 7,446 in the preceding year.

Special Institutions.

13(9). The Commercial school for girls maintained by the Young Women's Christian Association in Bombay, is the only institution of its kind in this Province. This school caters for girls who wish to take up secretarial work and instruction in Shorthand, Typewriting, Book-keeping, etc., is provided. Girls from this school usually take Pitman's Certificate and find no difficulty in securing employment.

Hostels.

13(10). Of the twenty-two schools which had hostels attached to them, 8 were for boys and 14 for girls. The total number of boarders in these hostels was 1,605, a decrease of 18. Under Articles 40 and 42-A of the Code of Regulations for European schools, boarding grants to orphans and destitute children are paid by Government. The total grants paid to boarders and day scholars during the year amounted to Rs. 1,11,864, as against Rs. 1,05,685 in the preceding year. The Young Men's Christian Association and the Young Women's Christian Association continue to maintain hostels for the benefit of apprentices working in business firms, etc., in Bombay. These hostels serve a very useful purpose and receive grants from Government.

Satisfactory arrangements for the medical supervision are made in all the hostels.

General.

13(11). Subjects like Manual training, domestic Science, needlework and dress-making receive special attention in some of the European schools. Physical training is in the majority of cases entrusted to qualified members on the staff and adequate provision is made for games, sports, etc. Practically every school has a Scout-troop, or a Guide Company.

The Inspector of European Schools makes the following remarks on the state and progress of Anglo-Indian and European Education in this Province during the year :—

" The European Schools in this Province meet the special needs of " the communities for which they are intended. At the same time, " offering a definite type of education which has its pattern in the

" West, they attract a large number of Indian pupils. For this reason " the maximum number of non-Europeans admissible was raised, in " January 1939, from 30 per cent. to 40 per cent.

" The year under report may be regarded as one of steady work and " progress. These schools are fairly constant in type, standard and " staffing. The efficiency and equipment, however, are improving " from year to year. The enthusiastic co-operation of the Heads " and Managers with the Department in carrying out the suggestions " made to them must be regarded as the most pleasing feature of these " schools."

CHAPTER XIV.

Education of Muslims.

Number of pupils under instruction.

14(1). Muslims constitute 8·8 per cent. of the total population of the Province. There was an increase in the total number of Muslim pupils under instruction in all kinds of institutions by 23,770, or 11·8 per cent. to 225,912. Of these, 210,781, or 93·3 per cent., were in recognised institutions, while 15,131, or 6·7 per cent., were in unrecognised institutions. The increase in unrecognised institutions was due to some of the Maktabs in the Northern Division having been struck off the list of recognised institutions during the year owing to unsatisfactory progress. The increase in the number of Muslim pupils in recognised institutions, which formed a pleasing feature of the preceding year's review, was well maintained during the year under report.

Details of the number of Muslim pupils attending different types of institutions will be found in Appendix I printed at the end of this Report.

The following table gives the numbers of Muslim pupils in recognised institutions in the different Divisions :—

	Number of Muslim pupils in recognised institutions.		Percentage of Muslim pupils to total pupils of all castes in such institutions.		Percentage of Muslim population to total population.
	1938–39.	1939–40.	1938–39.	1939–40.	
Bombay Division ..	55,255	63,448	12·9	12·6	8·6
Central Division ..	49,477	53,713	9·6	9 2	6·2
Northern Division ..	47,398	50,094	14·7	14·2	11·6
Southern Division ..	34,595	41,786	13·9	14·4	11·2
European and Secondary (English) Schools.	1,497	1,740	7·0	7·7	....
Total ..	188,222	210,781	12·2	12·0	8·8

The remarkable increase in the number of Muslim pupils in recognised institutions which was noticed in the preceding year's report constitutes also a happy feature of the year under review.

The following table compares the position of the education of Muslims with that of other communities on the basis of pupils under instruction to total population :—

Year.	Hindus.				Muslims	Others.	Average for all communities.
	Advanced.	Intermediate.	Backward.	Average for Hindus.			
1938–39 ..	25·2	6·8	5·2	8·0	12·0	15·9	8·7
1939–40 ..	27·0	7·0	6·4	9·2	14·3	16·8	9·9

These figures disclose the remarkable advance which the Advanced Hindu communities have made and the ground which the other communities, including the Muslims, have to cover before they can come into line with the educationally advanced classes. The progress achieved by the Muslims, however, so far, is very satisfactory and places them ahead of the Intermediate and Backward Hindus.

Expenditure.

14(2). Of the total number of Muslim pupils under instruction in recognised institutions, nearly 29 per cent. were under instruction in ordinary schools. It is not, therefore, possible to frame a correct estimate of the expenditure on Muslim Education. The expenditure may, however, be estimated roughly at Rs. 52,74,000 of which Rs. 23,67,000 come from Government funds.

Higher Education.

14(3). The number of Muslim students in Arts and Science colleges increased from 497 to 577, and that in Professional colleges from 275 to 299. The Ismail College, Andheri, now known as the Ismail Yusuf College, is primarily intended for the Muslim community and had 153 Muslim students out of a total enrolment of 281 students. Special facilities have been provided for Muslim students such as scholarships in Arts and Professional colleges and reservation of places in Government Professional colleges, to encourage Muslims to take to higher education. In addition to Government scholarships, there are a number of endowment funds for scholarships to Muslim students.

Eleven Muslim students took the B. T. degree during the year, as against 9 in the preceding year, and this is a matter for satisfaction, as more trained teachers are required for Muslim schools.

Secondary Education.

14(4). The number of Muslim pupils attending Secondary schools increased from 12,229 to 13,845, i.e. by 13·2 per cent. against an increase of 11·2 per cent. during the preceding year. The following table gives the percentage to population of pupils of different communities attending Secondary schools :—

	Hindus.				Muslims.	Others.	Average for all communities.
	Advanced.	Intermediate.	Backward.	Average for Hindus.			
1938–39 ..	5·32	0·30	0·09	0·67	0·77	4·79	0·85
1939–40	5·94	0·32	0·11	0·75	0·87	5·19	0·94

Although the Advanced communities have outdistanced all the other classes in Secondary Education, the Muslims hold a position which is satisfactory as compared with that of the Intermediate and Backward Hindus. Of the 13,845 Muslim pupils in Secondary schools, 9,263 or 66·9 per cent. were in the Middle school stage, and 4,582 or 33·1 per cent. in the High school stage. The corresponding figures for the previous year were 67·5 per cent. and 32·5 per cent.

Of the 13,845 Muslim pupils in Secondary schools, 4,561, or 32·9 per cent., were in 54 Secondary schools and classes teaching through the medium of Urdu.

Government maintains Anglo-Urdu High Schools for boys at Poona, Sholapur and Hubli, and an Anglo-Urdu Middle school for Boys at Nasik, and an Anglo-Urdu High School for Muslim girls in Poona. All these institutions, which impart instruction through the medium of Urdu, were attended by 705 Muslim pupils. In addition to these, 49 Anglo-Urdu Secondary schools and classes with 3,856 pupils were maintained by public bodies, private societies, individuals, etc.

The number of Secondary schools teaching through the medium of Urdu is limited and the need for more such institutions is realised, but no efforts are being made by Muslim leaders to start private institutions and supplement the efforts which Government are making in providing Secondary schools teaching through the medium of Urdu. If the endowment funds available for education were properly canalised and the right type of men came forward to start Urdu institutions, the results

would indeed be remarkable. The Deputy Educational Inspector for Urdu Schools, Central Division, in this connection reports that there is an awakening among the Muslims in some of the Districts in the Central Division. The leading Muslims of Ahmednagar have established a Society called " The Young Muslim Society " and have started an Anglo-Urdu Middle School with 33 pupils. Propaganda work is also reported to have started in the Satara and East Khandesh Districts, and there is a possibility of some more Anglo-Urdu Middle schools being opened in these Districts in the near future.

Besides the special institutions maintained for the benefit of Muslims, Government has provided special facilities in ordinary Government schools in the shape of reserved places, freestudentships and special scholarships. Schools, while Arabic is taught in the Government schools at Nasik, Jalgaon and Poona.

Hostels are attached to Government Anglo-Urdu High Schools at Poona and Hubli, and separate boarding arrangements are made for Muslim pupils in other Government High Schools which have hostels attached to them. Some non-Government Secondary schools also have hostel arrangements for Muslim pupils. In the Bombay Division, the Anjuman High School, Bombay, and the Anglo-Urdu High School, Bhiwandi, have provided hostel accommodation, while the Konkan Muslim Education Society maintain a hostel for Muslim boys attending the S. P. Hakimji High School, Bordi. A hostel for some 30 pupils is maintained by the Muslim Education Society at Nasik. In the Central Division, the Badriya High School, Poona, and the Darul Uloom Muslim High School, Panchgani, have hostels attached to them.

Primary Education.

14(5). The total number of Muslim pupils in Primary schools increased by 16,308 or by 9·6 per cent., to 186,220. Of these, 138,722, or 74·5 per cent. were in schools specially meant for Muslims and the remaining 47,498 or 25·5 per cent. were in ordinary schools. The bulk of the increase was in aided schools and was due mainly to the opening of a number of voluntary Primary schools.

Curriculum.

14(6). In Urdu Primary schools the following two alternative curricula are followed at the choice of the local members of the Muslim community :—

(1) The Urdu-Primary curriculum in which Urdu is used as a medium of instruction, and the regional language is taught as an optional subject ; and

(2) The Primary-Urdu curriculum in which instruction is imparted through the medium of a regional language with Urdu as a compulsory second language.

Urdu schools for girls follow a separate curriculum in which all the subjects are taught through the medium of Urdu. The total number of

District Local Board and Municipal Primary schools teaching the first alternative curriculum increased by 14 to 860 while the number of pupils in them increased by 6,703 to 87,654. The number of District Local Board and Municipal Primary schools teaching the Primary-Urdu curriculum increased by 21 to 453 and the pupils in them by 2,132 to 27,723.

Urdu schools teaching the Urdu-Primary course are more popular in urban areas than in rural areas. The Educational Inspector, Northern Division, in this connection reports that the Primary-Urdu course is more popular in rural areas. The Muslims in villages prefer the Primary-Urdu course as a good knowledge of the regional language helps them in their every day life.

The following table gives the number of Muslim candidates who passed the Primary School Leaving Certificate examination in regional languages and in Urdu during the years 1938-39 and 1939-40 :—

	Primary School Leaving Certificate Examination in			
	Regional Languages.		Urdu.	
	1938–39.	1939–40	1938–39	1939–40
Bombay Division	50	43	158	176
Central Division	142	158	121	305
Northern Division	76	98	145	147
Southern Division	63*	102	65*	131
Total ..	331*	401	489*	759

The number of Muslim pupils passing the Primary School Leaving Certificate examination has increased considerably this year. The increase is more marked in the Central Division and the Southern Division.

Primary teachers.

14(7). The total number of trained and untrained Muslim teachers in Government, District Local Board, and Municipal Primary schools increased from 4,003 to 4,204. Of these, 2,216, or 52·7 per cent., were trained, 1,769, or 42·1 per cent., were qualified, and 219, or 5·2 per cent., were unqualified. The percentage of trained teachers has slightly decreased during the year by 1·9. This decrease is probably due to the fact that during the year a large number of 1st year trained teachers were under training and qualified teachers were appointed in their place.

* Revised figures.

Education of Muslim girls.

14(8). The total number of Muslim girls under instruction in all kinds of recognised institutions increased by 8,553, or by 16·5 per cent., to 60,197. They were distributed as under :—

	1938–39.	1939–40.
Colleges	39	53
Secondary schools	997	1,259
Primary schools	50,394	56,940
Special schools	214	1,945
Total ..	51,644	60,197

It is clear from the figures that the increase in the number of Muslim girls is marked and well distributed. The progress of education among Muslim girls is, however, still far from satisfactory. As remarked in the preceding year's report the dearth of Muslim women teachers and the prevalence of the Purdha system among the Muslim community are some of the main factors which retard progress. The Deputy Educational Inspector, Urdu Schools, Central Division, reports that the lack of Muslim women teachers would be minimised to a certain extent, if other District Local Boards followed the example of the East Khandesh District and opened Central Urdu schools for Muslim girls.

Institutions, specially meant for Muslims.

14(9). The number of special institutions meant for Muslim boys increased by 327 to 1,738 and that for Muslim girls by 78 to 441. The total number of pupils in these institutions was 150,312, as against 131,703 in the preceding year. The total number of Maktabs on 31st March, 1940, was 61, and the number of pupils in them was 4,441. These are mostly Primary schools imparting religious instruction.

Condition of Muslim Education under Local Authorities.

14(10). The number of Primary schools and classes specially maintained for Muslims by District Local Boards increased by 6 to 819 and the number of pupils in such schools by 3,768 to 46,368. The number of similar institutions maintained by the Local Authority Municipalities increased by 7 to 482 and of pupils attending them increased by 4,965 to 65,511. Although these figures do not record any great or rapid progress, they provide an indication of the fact that within the limited funds at their disposal, the Local Authorities are doing what they can to meet the requirements of the Muslim community.

CHAPTER XV.

Education of Intermediate and Backward Classes.

Introduction.

15(1). The Intermediate classes comprise (1) the Marathas, (2) the Cultivating classes, (3) the Artisans and (4) the Lingayats, while the Backward classes comprise (1) the Schedule classes, (2) the Aboriginal and Hill Tribes and (3) Other Backward classes.

15(2). The Intermediate and Backward classes form 59 and 21 per cent. of the total population of the Province, while the percentages of pupils of these communities to the total number of pupils under instruction were 47·0 and 13·5 respectively. The percentages which the pupils of certain main communities under instruction bear to the total population of those communities are given in the table embodied in the Chapter on General Progress of this Report.

The following table gives the number of pupils belonging to the Intermediate and Backward classes in various kinds of recognised institutions during the years 1938–39 and 1939–40 :—

Kind of Institution.	Intermediate classes.			Backward classes.		
	1938–39.	1939–40.	Increase.	1938–39.	1939–40.	Increase.
Colleges ..	1,705	1,865	160	173	258	85
Secondary Schools.	31,632	34,730	3,098	3,448	4,061	613
Primary Schools	667,827	773,685	105,858	182,870	222,218	39,348
Training Institutions.	605	1,171	566	174	248	74
Other Special Schools.	14,759	22,246	7,487	8,641	13,495	4,854
Total ..	716,528	833,697	117,169	195,306	240,280	44,974

The total number of pupils of the Intermediate classes shows an increase of 117,169 or 16·4 per cent., during the year, as against an increase of 82,588 or 13·0 per cent. in the preceding year. In the case of the Backward classes the pupils increased by 44,974, or 23·0 per cent. during the year. The corresponding figures for the previous year

were 42,199, or 27·6 per cent. The largest increase, in both the cases, is in Primary and Special schools, which is reported to be due, as in the last year, to the opening of a number of approved Primary schools and Adult Education classes. Full details of the enrolment of pupils belonging to the various sub-sections of the Intermediate and Backward classes attending various kinds of institutions will appear in Appendix I published with this Report.

Intermediate Classes (Hindus).

15(3). The following table compares the number of pupils under instruction in recognised institutions belonging to the main sub-sections of the Intermediate Hindus :—

	Number of pupils in		Percentage of increase.
	1938–39.	1939–40.	
Marathas	244,558	293,394	20·0
Kunbis, Kolis and other cultivating classes..	261,067	302,882	16·0
Artisans, etc.	116,955	130,361	11·5
Lingayats	93,948	107,060	13·9
Total ..	716,528	833,697	16·4

It will be seen that the increase is shared by all the sub-sections, the largest increase being in the case of the Maratha community. The general tendency of the Agriculturist in Maharashtra is to call himself a Maratha and the increase in the numbers representing the Kunbis, Kolis and other cultivating classes may, therefore, be regarded as particularly noteworthy. These figures indicate the growing desire for education among these classes.

Special facilities.

15(4). The special facilities provided by Government for the education of the Intermediate classes have been mentioned in previous Reports. The same facilities were continued during the year. Apart from the special facilities given by Government, certain other facilities are extended to these classes by private bodies or individuals. In the Central Division boarding houses are maintained in almost all the towns for the benefit of pupils belonging to the Intermediate classes. These boarding houses provide board and lodging at a low cost.

In the Northern Division, a special school known as the "Bariya Kshatriya Boarding school" with a boarding house attached to it, is maintained at Ambali in the Panch Mahals District for pupils of the Dharala community. The school teaches the full Primary course with an agricultural bias and had 49 boarders on 31st March, 1940.

In the Southern Division, the Lingayat Association maintains an Arts College and four High Schools which are chiefly intended for the Lingayat community. The Association also awards scholarships to Lingayat students studying in colleges and Secondary schools.

Backward Classes.

General remarks and special facilities.

15(5). The following table compares the number of pupils of the Backward classes attending the various types of recognised Institutions :—

	Number of pupils in		Percentage of increase.
	1938–39.	1939–40.	
Scheduled Classes	92,026	111,682	21·4
Aboriginal and Hill Tribes	53,084	63,889	20·4
Other Backward Classes	50,196	64,709	28·9
Total ..	195,306	240,280	23·0

It will be seen that there has been an appreciable increase in the number of pupils belonging to these classes during the year.

The special facilities provided by Government for these classes mainly comprise (*a*) exemption from the payment of fees in Primary schools and in Government Secondary schools, (*b*) special Government scholarships in Primary and Secondary schools and in Arts and Professional colleges, (*c*) exemption in deserving cases, from the payment of room-rent in the hostels attached to Government Secondary schools. In addition to these facilities, financial help is given by the Backward Class Department in the form of lump scholarships to poor and deserving pupils of the Backward classes.

Government maintain a hostel for the Backward classes in Poona under the control of the Backward Class Department. There were 62 boarders in the hostel on 31st March, 1940. In addition to this hostel, a number of hostels are maintained by private bodies for the benefit of children of the Backward classes. In some of the hostels maintained for other communities, Backward class children are admitted. Grants are paid to all such hostels by the Backward Class Department.

Scheduled Classes.

15(6). The total number of pupils belonging to the Scheduled classes under instruction in all kinds of recognised institutions increased during the year by 19,656 or by 21·4 per cent., to 111,682, the corresponding increase for the previous year being 14,180, or 18·3 per cent. There was an all round increase in the number of pupils attending various kinds of institutions and especially in Primary and Special schools. In addition to the special facilities provided by Government, the School Boards also award scholarships to deserving pupils in Primary schools and provide them with books, and slates free of cost.

Every effort is made by Local Authorities and the Departmental Officers to see that no disability is imposed upon the pupils of the Scheduled classes. They are allowed to sit in the class-room along with caste Hindus and the orders issued by Government in this connection are enforced with firmness.

Of the 103,132 pupils of the Scheduled classes attending Primary schools, 13,187 were in 295 special Primary schools meant for children of these classes. The number of such special schools decreased by 46 during the year in consonance with the policy of Government that scheduled classes should receive instruction along with the children of other communities in common schools and that no separate schools for these classes should be maintained except under very special circumstances.

Aboriginal and Hill Tribes.

15(7). The Aboriginal and Hill Tribes mostly consist of Mahadeo Kolis, Thakurs, Katkaris, and Bhils inhabiting the slopes of the Sahyadris. As these tribes lead a nomadic life and wander from place to place the problem of bringing their children to school is a difficult one. A number of central schools with boarding houses attached to them have been maintained by the District Local Boards concerned for the benefit of the children of these Tribes.

The total number of pupils belonging to the Aboriginal and Hill Tribes attending all kinds of recognised institutions increased by 10,805, or 20·4 per cent., to 63,889, as against an increase of 21,747 or 69·4 per cent. during the preceding year. The largest increase was in Primary schools. The number of Primary schools and classes exclusively meant for children of these tribes increased from 307 to 704 and the pupils in them from 9,552 to 20,684. The increase was mainly due to the opening of a number of approved Primary schools by the Bhil Seva Mandal in the Bhil tracts of the West Khandesh District.

With a view to spreading literacy among these tribes 15 central schools with boarding houses attached to them are maintained by the District Local Boards at various places in the Bombay, Central and Northern Divisions. The Head Masters of these schools supervise the hostels and are paid a special allowance for the purpose. Stipends ranging in value from Rs. 6 to Rs. 7–8–0 per mensem are paid to boarders in the Central Division. A special itinerent teacher is appointed at each of the central schools at Neral and Peint. These teachers look after the education of the pupils in the schools and induce parents to send their children to school. These schools teach a full Primary course and an agricultural bias has been introduced in some of them.

In addition to these schools, a few boarding houses are maintained by private bodies for the benefit of children of these tribes.

The Bhil Seva Mandal in the West Khandesh district and the Bhil Seva Mandal started by Mr. A. V. Thakkar of the Servants of India Society are doing useful work for the education of the Aboriginal and Hill Tribes.

Settlement schools.

15(8). There are a number of Settlements and free-colonies established by Government under the Criminal Tribes Act, where Day and Night schools are maintained for the benefit of the children of the Criminal Tribes living in these settlements. They are under the control of the Backward Class Department.

Education in these Settlements and free-colonies is compulsory for children between the ages of 6 and 13. Of the total population of 12,709 in the Settlements, 3,163 attend the Settlement schools, while 441 attend outside schools. The percentage of the total number of pupils to the total population works out at 27·6. Pupils studying in Primary Standards V and above are sent to neighbouring District Local Board or Municipal Primary schools, and some of the children attend English schools also. The Backward Class Officer reports that one Girni-Waddar boy and one Lamani boy appeared for the Matriculation examination and one Berad girl passed the Kannad School Leaving Certificate examination.

In addition to secular instruction, Industrial classes are maintained for instruction in various trades, such as carpentry, masonry, weaving, agriculture, book-binding, tanning, flower-making, etc., for boys and spinning, sewing, needlework, etc., for girls. Some of the boys are also sent as apprentices to mills, workshops, etc. During the year under Report, special efforts were made to promote literacy among the adult settlers.

Other Backward classes.

15(9). The total number of pupils of these classes attending various kinds of recognised institutions increased by 14,513 or 28·9 per cent. to 64,709. The corresponding increase during the previous year was 14·3 per cent. only. Children of these classes are eligible for those special facilities which are provided for the Backward classes as a whole.

Reservation of places for the Intermediate and Backward classes.

15(10). Places are reserved for the Intermediate and Backward classes in various types of educational institutions as under :—

	Percentage of places reserved.
(*i*) Government Secondary Schools—	
Intermediate	30
Backward	20
(*ii*) College of Engineering, Poona	25
(*iii*) Professional Colleges	10
(*iv*) Government Training Institutions—	
Intermediate	60
Backward	15

Teachers.

15(11). The following table compares the number of trained and untrained teachers belonging to the Advanced, Intermediate and Backward Hindu communities in Government, District Local Board and Municipal Primary schools during the years 1938–39 and 1939–40 :—

		1938–39.	1939–40.	Increase.
	Advanced			
Trained	.. .. ..	6,951	7,003	52
Untrained	.. .. ..	5,835	6,216	381
	Total ..	12,786	13,219	433
	Intermediate			
Trained	.. .. ..	5,541	5,636	95
Untrained	.. .. ..	5,029	5,554	525
	Total ..	10,570	11,190	620
	Backward			
Trained	.. .. ..	932	965	33
Untrained	.. .. ..	1,220	1,482	262
	Total ..	2,152	2,447	295
Total ..	Trained ..	13,424	13,604	180
	Untrained ..	12,084	13,252	1,168
	Total ..	25,508	26,856	1,348

The total number of teachers belonging to the Intermediate and Backward classes shows a steady increase. The percentage increase in the case of these two classes was 5·9 and 13·7 respectively, as against an increase of 3·4 per cent. in the case of the Advanced classes. These figures show that while recruiting candidates for employment as Primary teachers by the Local Authorities preference is given to candidates from the Intermediate and the Backward classes.

CHAPTER XVI.

Schools Certified under the Bombay Children Act, 1924.

Introduction.

16(1). The Juvenile Branch Administration Report published by the Backward Class Officer deals with the various aspects of Certified schools which are governed by the provisions of the Bombay Children Act. The remarks in this Chapter are confined to the purely educational work of these schools.

Number of Schools and pupils.

16(2). There are three principal Certified schools and 14 Junior Certified schools in this Province which are under the control of the Chief Inspector of Certified Schools. The Willingdon Boys' Home and the Junior Certified School of the Children's Aid Society in Bombay were closed in October, 1939, and a Children's Home at Chembur was opened during the year. The following table gives the enrolment and the average cost of the principal Certified schools :—

Name.	Management.	Number of pupils on rolls on 31st March 1940.	Average annual cost per pupil.	
			Total cost.	Cost to Government.
1	2	3	4	5
			Rs.	Rs.
1. Industrial School, Yeravda.	Government ..	241	186	171
2. David Sassoon Industrial School, Matunga, Bombay.	Committee of Management.	379	204	175
3. Children's Home, Chembur.	Children's Aid Society, Bombay.	375	101	101

Secular Instruction.

16(3). Provision is made for instruction up to Primary Standard IV or V in all the three schools and in the first two, English is also taught. Instruction in various Vocational subjects is also imparted so that during the period of detention a boy may acquire knowledge of a useful trade or craft. The educational organisation of these schools is based on two shifts so that each boy gets an opportunity of learning at least one craft in addition to ordinary instruction in the mother-tongue. Half the number of boys attend the Industrial classes while the other half receive secular instruction.

The 14 Junior Certified schools have an enrolment of 1,039. Six of these schools have their own schools or classes for secular instruction, while children from the remaining institutions attend ordinary Primary or Secondary schools. These children are also taught certain useful industries or are sent as apprentices to mills or workshops.

These schools are no longer regarded as penitentiaries but as normal institutions maintained for the mental and physical development of the children who are admitted to them as a result of uncongenial surroundings or of neglect. Every effort is made to maintain an atmosphere of happiness and cheer and to create a sense of self-respect and self-reliance.

CHAPTER XVII.

Education of Defectives.

Provision is made in this Province for the education of the blind and of deaf-mutes and the remarks in this Chapter are, therefore, confined to such defectives only.

Schools and pupils.

17(1). The existing provision for the education of defective children consists of three schools for the blind with 122 pupils and nine schools for deaf-mutes with 291 pupils. The Poona School and Home for the Blind, Professor Date's School for Deaf-Mutes at Nasik and the Dumb and Deaf School at Pen were recognised during the year. The following table gives a statistical summary of the schools for defectives:—

	Number of pupils on 31st March, 1940.	Expenditure.		Average annual cost per pupil.	
		Provincial.	Total.	Cost to Government.	Total cost.
1	2	3	4	5	6
		Rs.	Rs.	Rs.	Rs.
For Blind.

5. Professor Date's Dumb and Deaf Institution, Bombay.	39	1,200	5,467	29	133
6. New Dumb and Deaf Institution, Kakadwadi, Bombay.	26	200	1,699	10	85
7. Dumb and Deaf School, Pen.	11	..	808	..	101

	Number of pupils on 31st March, 1940.	Expenditure.		Average annual cost per pupil.	
		Provincial.	Total.	Cost to Government.	Total cost.
1	2	3	4	5	6
		Rs.	Rs.	Rs.	Rs.
8. Dumb and Deaf School, Ratnagiri.	12	100	1,004	8	84
9. Professor Date's Dumb and Deaf School, Nasik.	21	514	1,694	34	113
10. N. G. Gondhalekar's School for Dumb and Deaf, Poona.	36	400	1,790	11	51
11. Dumb and Deaf Institute, Sholapur.	20	100	1,170	6	69
12. School for Deaf-Mutes, Ahmedabad.	79	3,800	9,919	53	138
Total ..	413	15,409	58,687	38	144
Total for 1938–39 ..	344	12,944	53,546	37	152

All these schools are maintained by private bodies, and, with the exception of the new school at Pen, receive grants from Government or Local Bodies. The majority of these schools provide board and lodging for their pupils.

School work.

17(2). The blind receive instruction in the three R's in the regional languages by means of a Braille Code. Efforts are being made to devise a common braille suited to the needs of Indian schools. The braille devised by the late Dr. Nilkanthrai is being tried in the Victoria Memorial School.

In addition to ordinary instruction, regular and systematic training in certain crafts is taken up. Cane and bamboo work, knitting, mat-work and bidi-making are some of the crafts taken up. Music, both vocal and instrumental, provides a special attraction for the blind and provision for the teaching of Music exists in these schools. The Music teacher at the Victoria Memorial School for the blind has formed an orchestra which is reported to have given several public performances.

In the case of deaf-mutes lip-reading and articulation form the main features of instruction. As in the case of the blind, deaf-mutes also receive practical instruction in various useful crafts. Drawing, sign-board

painting, carpentry and tailoring are popular. In some cases, after some preliminary instruction, the pupils are apprenticed to good sign-board painters, tailors or carpenters.

Arrangements for the medical inspection of pupils are made in all schools and physical drill and games suited to the conditions of each place are encouraged. Excursions to places of interest are made wherever possible and every effort is made to keep the children happy and cheerful.

Advantage was taken of the presence of Sir Clutha Mackenzie of St. Dunstan's in Bombay and he was requested to visit schools for the blind in Bombay. He made valuable suggestions and his visit was greatly appreciated by the managers of the schools.

17(3). In each school a record is maintained of all past students and efforts are made to secure employment for them or to help them in other ways. Considerable difficulty is being experienced to find employment for the blind, but useful work in this connection is being done by the Narsingrao Shivaji Dharmaji Industrial Home, Bombay, the Happy Home for the Blind and the Blind Relief Association, Bombay.

General.

CHAPTER XVIII.

Adult Education.

Introduction.

18(1). Adult Education in this Province originated in towns and cities where public spirited workers and organisations of a missionary character attempted to provide facilities to industrial workers and others to acquire the three R's. Prior to 1937, although there were a fairly large number of night schools, those attending such schools were grown-up lads who could not attend day schools. The classes meant for illiterate adults were limited and restricted to big towns and cities. In subsequent years the special provision made in the budget for Adult Education gave a definite impetus to literacy classes for adults, and various associations interested in Adult Education Classes took full advantage of the grants-in-aid provided to develop their activities.

During the year under report the special provision made for Adult Education was increased, and over Rs. 1,50,000 utilised in consultation with the Provincial Board for Adult Education. Under the scheme sanctioned for literacy classes Adult Education workers were registered by the Provincial Board for Adult Education, and the literacy classes opened by these workers registered for grant-in-aid by the Department. The inspection of the classes, the holding of literacy tests and the payment of grants-in-aid, remained in the hands of the District Educational Officer. The grant paid was a basic grant of Rs. 5 per mensem if the average daily attendance of the class was not less than 15. In addition a non-recurring grant not exceeding Rs. 40 was given for each class.

During the year the number of classes increased from 432 to 2,300 with an enrolment of 58,000 adults of whom 13,000 were made literate during the year. The total amount of grant paid to these classes was Rs. 86,500 of which an amount of Rs. 27,000 was paid by way of an equipment grant. The average cost came to about Rs. 6–8–0 per adult made literate. During the course of the year, the Provincial Board of Adult Education, in view of the heavy cost involved, decided to reduce the rate of grant for future classes. The grant sanctioned was a capitation grant of As. 10 for every adult made literate (or Re. 1 in places where there was no local board school), plus an equipment grant of Rs. 12 per class. This reduction in the rate of grant proved a damper to the classes, and by the end of the year nearly 50 per cent. of the classes were closed.

Number of Literacy Classes for Adults.

18(2). The following figures give an idea of the number of literacy classes for Adults maintained during the year in the Province other than the City of Bombay :—

Total number of classes on 31st March, 1939 ..	432
Total number on the rolls on 31st March, 1939 ..	13,700
Maximum number of classes working in 1939–40 ..	2,336
Maximum number on rolls	53,378
Average attendance for all classes	40,000
Average attendance of a class	19
Number made literate during 1939–40	13,208
Total Cost	..Rs. 86,558*
Number of classes on 31st March, 1940	1,085

*Including about Rs. 27,000 paid for equipment.

In regard to the city of Bombay, the following figures shew the progress made :—

Session.	Number of classes.			Number on roll.		
	Men.	Women.	Total.	Men.	Women.	Total.
From May, 1939 to February, 1940.	874	86	960	17,199	1,439	18,638
From January, 1940 to June, 1940.	321	113	434	6,442	1,781	8,223

Sessions.	Number of adults made literate.			Percentage of Literate adults to the number of adults on roll.		
	Men.	Women.	Total.	Men.	Women.	Total.
From May, 1939 to February, 1940.	13,465	1,023	14,488	78·3	71·1	77·7
From January, 1940 to June, 1940.	Classes started in 1939–40 but completed their course in 1940–41. Therefore figures for those who achieved literacy in these classes are not given.					

With limited funds at its disposal, the Bombay Committee find it difficult to pay the workers and extend the scope of the work. So far it has depended mainly on Government and Municipal aid. The response of the public to the appeal made by the Committee cannot but be regarded as disappointing.

Schools and Pupils.

18(3). The total number of schools and classes for Adults increased during the year by 830 to 1,503 and the number of pupils by 15,958 to 38,053.

Of the 1,503 institutions, 2 with 131 pupils are secondary, 1,495 with 37,571 pupils are primary and 6 with 1,125 pupils are special schools.

The following table shows the number of Primary schools and classes for adults in each division as they stood on 31st March, 1940 :—

	Number of schools and classes.		Number on rolls.	
	1938-39.	1939-40.	1938-39.	1939-40.
Bombay Division ..	117	580	4,224	12,696
Central Division	237	432	7,491	12,348
Northern Division ..	157	128	5,495	3,639
Southern Division ..	154	355	4,475	8,888
Total ..	665	1,495	21,685	37,571

During the year there was a marked increase in the number of classes and the number of adults attending these classes as compared with the previous year. The increase was mainly due to the greater provision made in the budget, the introduction of the scheme for registering workers and the payment of a grant to these classes on a fairly liberal scale, during the greater part of the year 1939-40.

Of the special classes intended for women, particular mention may be made of the four special industrial classes conducted by the Seva Sadan, Bombay, and the five classes of the Seva Sadan, Poona. These classes provide instruction in sewing, tailoring, music and English.

Expenditure.

18(4). The total expenditure during the year under report on schools, classes, etc., for adults amounted to Rs. 3,00,794 of which an amount of Rs. 1,10,914 was met from Provincial funds, Rs. 1,51,799 from Board funds Rs. 5,080 from fees and Rs. 33,001 from other sources.

18(5). A large proportion of those employed after completing their elementary or secondary school course are in need of facilities for further education. A good number attend commercial classes after office hours to get a better grounding in their profession. This system might well be extended to other forms of professional and technical education. Experiments have now been made with a fair amount of success in Bombay and it is on these lines that progress appears to be possible and necessary in large industrial towns.

Extension work.

The Bombay Presidency Adult Education Association is doing work of this type and has been established with the object of providing higher education on a broad and liberal basis. The Association conduct extension courses, free literacy classes, and free libraries and reading rooms. The extension courses are conducted at three centres and the work consists of a graded two year course in Philosphy, Economy, Political Theory and Languages. For the language course Russian was introduced during the year in addition to French, German, Italian and Spanish. Over 380 students took advantage of these special courses. For literacy the Association maintain in various parts of the city 15 classes which were attended by 374 students. Over 4,000 readers every month took advantage of the free libraries and reading rooms.

Apart from regular schools and classes for Adult Education, attempts are also being made to spread ideas of better housing, better sanitation and better and brighter living by means of lectures and talks on topics of everyday interest to the villagers under the auspices of various village societies and rural uplift committees. The giving of lantern lectures and cinema shows in public forms a part of the work entrusted to the Deputy Educational Inspector for Visual Instruction. During the year under report, he delivered 95 lectures, and other District Educational Officers delivered over 1,000 lantern talks during their tours. These talks were on a variety of topics of vital importance to the villager, such as health, child-welfare, agriculture, sanitation, co-operation, etc.

CHAPTER XIX.

Unrecognised Institutions.

19(1). The foregoing Chapters of this Report deal exclusively with Recognised Institutions under public or private management which conform to the regulations and standards prescribed by Government and the University. The remarks in this Chapter are confined to the state and progress of Unrecognised institutions which do not necessarily follow a course of studies recognised by the Department and which do not submit to inspection by officers of the Department. Most of these institutions are Primary or Special schools which impart elementary education. The following table compares the statistics of schools and pupils for two years :—

	1939–40		1938–39		Increase or decrease.	
	Schools.	Pupils.	Schools.	Pupils.	Schools.	Pupils.
Bombay Division.	129	6,649	183	9,911	—54	—3,262
Central Division..	30	1,501	41	1,608	—11	—107
Northern Division.	290	19,608	263	16,776	+27	+2,832
Southern Division.	17	613	31	1,383	—14	—770
Total ..	466	28,371	518	29,678	—52	—1,307

There was a drop of 52 in the number of schools which was apparently due to these institutions having been taken on the list of recognised schools. The Northern Division records an increase of 27 institutions and 2,832 pupils which the Educational Inspector attributes to the unreliability of the figures returned by unrecognised schools.

The number of pupils in Unrecognised schools formed 1·6 per cent. of the total number of pupils under instruction as against 1·9 per cent. in the preceding year. Of the 28,371 pupils under instruction in Unrecognised institutions 10,694 or 37·7 per cent. were Hindus, 15,131 or 53·3 per cent. were Muslims and 2,546 or 9·0 per cent. belonged to various other communities.

The 466 Unrecognised institutions may be classified as follows :—

	Number of institutions.	Number of pupils.
Colleges	3	186
Secondary schools	82	7,023
Primary and Special schools ..	381	21,162
Total ..	466	28,371

The three Collegiate institutions are the Shree L. U. Mahila Pathashala, Ahmedabad, and the S. N. D. T. Arts Colleges in Bombay and Poona, which are affiliated to the Indian Women's University. These institutions provide for a course leading to the G. A. degree of the University.

Among the Unrecognised Secondary schools the Samarth Vidyalaya, Talegaon Dabhade, and the Maharashtra High School of the Ananth Vidyarthi Graha, Poona, are reported to be well managed on the whole.

A large majority of the Unrecognised Primary schools teach an elementary course which is generally confined to the three R's. They are mostly situated in villages which have no schools maintained by the Local Authorities.

Unrecognised special schools mainly comprise Pathashalas or Maktabs. Pathashalas generally cater for Vedic studies while Maktabs impart elementary instruction in addition to instruction in the Koran. Some of the Unrecognised special schools impart instruction in subjects like Music and Physical Culture, while there are a few schools which provide a graded course of instruction in the Ayurvedic as well as the Western system of medicine and surgery.

Poona,

Explanatory Notes :—

(1) Figures for *urban* areas (i.e. municipal, cantonment, notified and small town committee areas) are excluded from this table.

(2) The expenditure on institutions includes expenditure on buildings and miscellaneous charges incurred on the schools.

(3) The total number of pupils from rural areas, who are under instruction, is shown in the last column of Tables IV-A and B and V-A and B.

(4) This table includes statistics relating to *training schools*, whether situated in urban or in rural areas, in which the majority of the students are being trained for employment in *rural* areas. It does not include the returns of training institutions located in rural areas, the majority of the students in which are trained for schools in *urban* areas.
